### DOMINION DAY CELEBRATION

The sports committee and others met in A. W. Gordon's office on Saturday evening, and final preparations were made for the big day.

The big parade, led by Pipe Wm. Russell and Duncan Cameron, will leave the Main Street at 12 o'clock. Bring the kiddies in plenty of time that they can take part in the parade. The parade will proceed to the school grounds, where a short patriotic program will be held, and then to the fair grounds.

The first game of the baseball tournament and the athletic events will start at 1 o'clock sharp.

The decoration committee asks for the co-operation of the business men and citizens generally to put up decorations, flags, etc., and give up the town a gala appearance.

### FINES ORDERED FOR J. CUMING

Found not guilty of indecent assault, but guilty of common assault and of distributing obscene writing, James Cuming of Crossfield on Monday was sentenced to fines of \$100 on each of the latter two charges or, in lieu of fine, to two months' imprisonment on each charge, the sentences to run concurrently. Hon. Mr. Justice Boyle pronounced sentence in Criminal Court. The accused, warned by His Lordship to be very careful of his behaviour in the future, was permitted to leave court on his personal recognizance until the end of the week in order to raise money to pay the fines. His Lordship declared that only the splendid overseas record and past good conduct of the accused had saved him from a sentence to two years in the penitentiary. G. W. Harold Milligan appeared for the defence and A. L. Smith, K.C. for the Crown, Calgary Albertan.

James Cuming answered to three charges in the Criminal Court, Calgary, that was preferred against him by the Riddell family, it appears that this trouble is the outcome of several years of close friendship and neighborly dealings

Crossfield Gets A Surprise J. R. Gilchrist who has been an employee of the C. P. R. for about twenty-six years, and who has been station agent at Crossfield for the past twenty-one years, has apparently been given the Irish promotion.

He has been relieved of being a station agent, but retains his standing as an operator. "Joe" is at present taking a holiday, after which he expects to return to work as an operator at some point in Alberta.

Mr. Gilchrist has been a first class agent and without a doubt has served this district and possibly his employers better than any other man in that position, at least from the standpoint of public service. We understand that a slight carelessness in performing his duties has been the cause of Joe's setback.

W. A. Stacey of Red Deer, is at present in charge of the local station until a permanent agent is appointed.

School Board Meetings The Crossfield School Board have been having their own troubles of late. Mrs. Harrison resigned two weeks ago, following a meeting at which she pulled no punches in referring to one of the teachers who she believed should be let out.

A special meeting was then called on Thursday of last week to discuss with the ratepayers the advisability of teaching Grade XII. (Continued on Page 8)

### Board of Trade Picnic to E. P. Ranch, Greatly Enjoyed

The Board of Trade picnic to the E. P. Ranch at Pekisko was a great success. The weather was ideal. Prof. Carlyle, Manager of the E. P. Ranch met the party on the grounds and after lunch (coffee being supplied by Mrs. Carlyle) the guests were shown the interior of the house, containing as it does many beautiful engravings and ornaments of interest.

Sheep, horses, and cattle were then shown and the party given an instructive opportunity to judge and place the cattle. Anyone who had the privilege of viewing the animals on the E. P. Ranch must have been impressed with the quality of the stock and far reaching effect that such animals must play in the improvement of their respective breeds not only in this Province but far beyond it.

Our thanks are due to Prof. and Mrs. Carlyle for their kindness in granting us this opportunity.

Mr. Tredaway believes it was a wise dispensation that enabled him to further enjoy the hospitality at the E. P. Ranch.

### Village Council Make Needed Improvements

It is gratifying to see that the Village Council are grading up the west end of Onder Street, over which much traffic runs the year round. In the winter months many vehicles have been held up on this road owing to the snow drifting right across it, and much hardship has been endured by those getting stalled either with an automobile or with team and wagon.

Another big improvement to the town is the opening up of the St. going north to the Fair Grounds which will be a boon to many who have occasion to use this road every day in the year, furthermore it will relieve much traffic on Limit Avenue and Strathcona Street. The west end of Hammond Street has also been graded and put in good condition.

The Council are also making improvements in at the park taking out the old trees and preparing the grounds for a hedge along the north side.

With the improvements being carried out this summer by the Council, it is hoped that the citizens of the town will co-operate with the Council in the payment of their taxes because these necessary expenses have to be paid and it is only through the taxpayer that these improvements can be carried out.

It is interesting reading when you receive weekly newspapers from other towns the size of Crossfield with headings—"Taxes Coming in for 1933." It makes one wonder what our own citizens are doing along these lines.

### Carstairs Stampede

Wednesday, July 5th.

All roads lead to Carstairs next Wednesday, July 5th, for Carstairs 8th Big Stampede, which is being held under the auspices of the old-timers of the district.

A full day's program of sports and athletic events, baseball and stampede events will be pulled off. Commencing with the monster street parade at 10 a.m. there will not be one dull moment, as the committee have arranged for some of the best riders and worst horses in the west. On the midway there will be a number of new games and the usual hot dog and refreshment booths.

As a fitting climax to the big frontier celebration, Hopkins Old-Time Orchestra will supply the music for the biggest dance of the year, which will be held at night. Mark the date—“Wed., July 5” on your calendar and plan to be in Carstairs next week.

Admission: Adults 50c, School Children Free, Cars Free.

"Fresh from the Gardens"

Who Owns Canada?

The question which appears as the heading of this article was included in examination papers recently submitted to pupils in Montreal schools coming under the jurisdiction of the Catholic School Commission of that city. Answers to the question revealed such vague and uncertain knowledge concerning the status of the Dominion that the Commission appealed to the Secretary of State at Ottawa for an authoritative definition of Canada's status within the British Commonwealth of Nations, and among the world of nations.

The answer, given over the signature of Hon. C. H. Cahan, Secretary of State, defines Canada as a self-governing state of the British Commonwealth of Nations. It sets forth that Great Britain does not own Canada any more than Canada owns Great Britain; that Canada and Great Britain are each independent members of the British Commonwealth, and that the Dominion belongs to the people of the Dominion.

This answer should set at rest a large amount of uncertainty among Canadians regarding the official status of the land of their birth. It was evident from the answers submitted in the school examinations at Montreal that the subject had not been sufficiently emphasized by the teachers, and the secretary of the Catholic School Commission has stated that in future more attention will be paid to it. It would be well if this was done, not only in the Catholic schools of Montreal, but in all schools throughout the Dominion.

Canada is today an absolutely free and independent nation—just as much so as any other nation in the world. The King of Canada is George V. He is also King of Great Britain, King of Australia, Emperor of India. In Canada the King is represented by the Governor-General, who is appointed by the King on the advice of the Government of Canada. At one time the Governor-General was appointed on the advice of the Government of Great Britain, and he represented that Government, as well as the King, in Canada. Now, however, he represents the Crown only, while the British Government is represented in Canada by Commissioners of the same manner as the United States. France and Japan are represented by Ministers, and Canada is represented in Great Britain by a Commissioner just as other countries are represented there by Ambassadors and Ministers.

The term and status of "Commissioner" is employed between two Dominions of the British Commonwealth because each have a common sovereign and such a sovereign does not send an Ambassador or Minister to represent him as he does to represent him to other sovereign nations. The Crown being represented in the person of the Governor-General, the King's several governments are represented the one to the other by Commissioners.

The question may be asked; If Canada is an independent, fully self-governing Dominion of the British Commonwealth of Nations, why does it not enjoy the power to amend its own constitution, and why are appeals taken from decisions of the Supreme Court of Canada to the Privy Council in Great Britain? Other nations, it may be urged, have power to amend their own constitutions, and their Supreme Courts are final courts of appeal.

The answer is, that Canada can exercise both these powers whenever the people of Canada desire to do so, and probably the time will come when they will so decide. Up to the present, however, Canada has preferred to retain to itself the right of carrying judicial appeals to the impartial tribunal of the Privy Council, especially in all matters in dispute between the Federal and Provincial Governments. There is no compulsion that it should do so, but it may refrain from so doing, or can abrogate that right should it deem it wise to do so.

So, too, in regard to amendments to the Canadian constitution. The B.N.A. Act created a confederation of Provinces, reserving to the Dominion certain exclusive powers on the one hand and certain other exclusive powers to the Provinces on the other hand, while in regard to some matters jurisdiction was divided between the two authorities. The Provinces, therefore, have as much right as the Dominion itself to say when and how the constitution shall be amended, and up to the present time certain of the Provinces have preferred to leave the matter as it was at the time of Confederation, with the British Parliament making such amendments to the constitution of Canada as the Parliament of Canada, with the consent of the Provinces, may request. But Canada can secure full and final control over its own constitution if and when the people so desire.

So, the complete and final answer to the question: "Who Owns Canada?" brings us back to the definition given by the Secretary of State at Ottawa—the Dominion belongs to the people of the Dominion. They are masters of their own national destiny. Nobody can tax them but themselves; they pay tribute to no other nation. Canada can make its own treaties with other nations irrespective of the effect such treaties may have upon other Dominions of the British Commonwealth.

But, because the Dominion belongs solely to the people of the Dominion, the great responsibility rests upon them as citizens of a sovereign nation among the nations, with absolute equality in the League of Nations, to govern themselves, and to conduct their national and international relationships, as to command the respect of and wield a great influence for good in the world. There should be no spirit of a narrow nationalism in Canada; quite the reverse.

#### Mayors Are Youthful

The mayor of Detroit is 21 years old and everyone is commending his youthfulness. He is extremely youthful to be assuming such a heavy responsibility. We should like to point out that the mayor of Windsor is but 33 years old and that he is now well into his second term. He was 30 when he took on the job and, furthermore, for supply of worms at terminals he had no aldermanic experience. —Border Cities Star.

Of course women are vain creatures who like to be looked at but mir, among the Himalayan glaciators, you've noticed who does the most marching in parades.

#### Railway Man Solicitor

Recently J. F. Pringle, general superintendent of transportation for Canadian National Railways, received on the fact that he is extremely youthful to be assuming such a heavy responsibility. We should like to point out that the mayor of Windsor is but 33 years old and that he is now well into his second term. He was 30 when he took on the job and, furthermore, for supply of worms at terminals he had no aldermanic experience.

The hottest place in the world is Lakad, an isolated province of Kashgar, and the sun here is scorching the summertime. You cannot tell when it seizes you how it is going to end. Let it run for a day or two and see how weak and prostrate it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief. Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

#### Chemical Products

##### Depression Does Not Seem To Affect Demand For Toilet Preparations

It is evident from the study of the recently issued preliminary report on the production of chemicals and allied products in Canada in 1932 that the depression has practically no effect on the demand for toilet preparations. In 1928 the selling value of these preparations at the plants where they were made was \$4,615,291. In 1931 the value of the output had risen to \$5,946,292 and in 1932 it was \$5,073,134.

The demand for medicinal and pharmaceutical preparations continues on the upgrade. In 1928 the combined value of these products made in Canada was \$17,224,351 and in 1932 it was \$18,145,573, the high mark of \$10,038,894 being reached in the memorable year of 1929 when for several months prices of every commodity were at their highest point.

The chemical and allied products industry in Canada is a substantial one. Last year the aggregate production had a value of \$95,540,340. It is divided into 14 groups and there are 628 factories, most of which are in the Provinces of Ontario and Quebec. The 14 groups are as follows: coal tar distillation; acids, alkalies and salts; compressed gases; paints, pigments and varnishes; soaps and washing compounds; medicinal and pharmaceutical preparations; toilet preparations; fertilizers; wood distillates; inks; adhesives; polished and lacquered finishes; extracts, and miscellaneous chemical industries.

Imports into Canada under the classification of chemicals and allied products were valued in 1932 at \$27,561,580. About 62 per cent of \$17,275,161 was purchased from United States and 17 per cent, or \$4,719,074 from the British Isles. Exports from Canada increased slightly in 1932, the total value being \$11,033,179 as compared with \$10,482,946 in 1931. United States, United Kingdom, Mexico, Portuguese Africa, Newfoundland, Hawaii, Australia, British India, Netherlands, Cuba and China in the order named were the main purchasers of Canadian chemicals and chemical products.

#### Membership Shows Decrease

##### Quakers Are Having Controversy Over Members By Brightlight

Membership of the Society of Friends—the Quakers—shows a slight decrease in Great Britain during the last 12 months. There are now 19,119 registered members compared with 19,212 in the peak year of 1916.

The Society of Friends is one of the religious bodies into which children accepted at birth, without either baptism or, at a later date, confirmation or confession of faith. The "brightlight" controversy recently has been seriously criticized, and it is now possible for Quaker parents to delay the acceptance into membership of their children until the young people are of an age to decide theological matters for themselves.

Last year the society accepted by conviction 219 new members, 47 fewer than in 1931, while 130 individuals either resigned or were disown or dissociated. There were registered 80 "brightlight" members and 50 minors; but 318 Friends were lost to the society by death.

#### More Freight Moving

##### Transportation Situation Shows Signs Of Improvement

The transportation situation in Canada is showing considerable improvement and reflects the increasing confidence of the buying public and improving internal and external commerce, said a bulletin issued by the Department of Trade and Commerce. Carloadings for the week ending June 10 numbered 40,842 cars, an increase of nearly 2,000 cars over the preceding week and representing the largest movement of freight in 34 weeks.

"Movement of merchandise freight, representing as it does the shipments from manufacturer to wholesalers and wholesalers to retailers showed a marked improvement," said the bulletin. "Movement of merchandise by railroad has climbed up to nearly three-quarters of normal while that via canal boats in May was approximately double that of the corresponding month last year. Iron ore passing through the St. Lawrence Canal was heavier by over 6,000 per cent, and bituminous coal was practically double that of May, 1932.

There is a saying that heaven will protect the poor working girl. "But who will protect the guy she is working?" asks a college wise-cracker.

#### HAD RHEUMATISM FOR 20 YEARS

##### But None Since 1930

That man must have something like a record for suffering. He says—"Since 1910 up to 1930—that is 20 years—I have been a great sufferer with rheumatism. I am pleased to say that since 1930 I have had no more than a little of that dreadful pain, simply by taking Krusches Salts—and nothing else. I must say that over 20 years a long time to have had such terrible pain above the knee." —W. P.

Your rheumatism is just like his and everyone else's. It is caused by sharp-edged uric acid crystals getting into your joints. These crystals dissolve those crystals away. Furthermore—if you keep up the "little dose" ever afterwards, it will never be possible for them to form again. Rheumatism will be gone for good.

#### Joy-Riding By Air

##### New People Have Money For Extravagant Notions

One night the staff of St. Hubert Airport, near Montreal, had word that an airplane was coming in, and they turned on the beacons and lights.

At 12:30 midnight the plane arrived from Roosevelt Field, New York. There followed two men and a woman, in evening clothes. A taxi cab was waiting, and it hurried them away to Montreal.

Just before four o'clock the party returned, boarded the plane, and were back in New York for an early breakfast.

Thus between sunset and morning these people travelled to Montreal, had three hours in that city, flew home in time for work. The cost of the outing was about \$500. If the incident has a moral perhaps it is this: New York has money for extravagant notions, and that the new aeroplane did not destroy the strong attraction of Montreal for its wealthy neighbors.—Ottawa Journal.

#### Use of Anti-Toxin

##### New Treatment Of Diseases Of Children Is Reported

New developments in treatment of two diseases of children, scarlet fever and whooping cough, were reported to the American Medical Association.

There is hope that it will be possible to immunize infants against whooping cough just as they are protected from diphtheria, by treating them with a vaccine, said Dr. Louis W. Sauer, of Evanston, Ill.

Tests showed, he said, that not one of the children he vaccinated contracted the disease.

Use of anti-toxin in cases of scarlet fever has been definitely shown to reduce severity of the disease and its dreaded complications. Dr. Luke W. Hunt, of McCormick Institute for Infectious Diseases, Chicago, reported, summarizing study of more than 2,000 cases.

The anti-toxin should be given within the first day or two after the patient becomes ill with scarlet fever.

#### Smashing the Atom

##### Powerful Hammer Devised By Scientists Accomplishes Feat

The most powerful hammer yet devised for smashing the centres, or cores, of atoms, which are believed to hold the secret of how all matter is built, was described before the American Association for the Advancement of Science.

This atom-smashing hammer is the deuteron, the infinitely small but enormously powerful core of the heavier of the two atoms of hydrogen which is fired like a bullet into the cores of atoms that are to be smashed. Latest results of its use were reported by Drs. Gilbert N. Lewis, M. Stanley Livingston and Ernest O. Lawrence of the University of California.

#### Removed Half Of Brain

Removal of almost all of the right half of a woman's brain with no noticeable effect on her mentality and only partial paralysis on the left side was reported to the American Medical Association. Twenty months after the operation, Dr. Gardner said, "examination disclosed no change in intellect."

The Irish Free State expects many visitors from America this summer.

#### Permanent Exhibition Planned For London

##### Alexandra Palace May Be Turned Into Amusement Place

There is a prospect of London being endowed with a permanent "Wembley Exhibition." The Alexandra Palace, on the northern heights of London, Eng., which has long been the despair of all concerned with it, has been taken in hand by no fewer than 18 local authorities, who have recommended grants for its modernization which will amount to \$1,000,000. It is proposed the Palace shall be so renovated as to convert it into a first-rate place of exhibition and general amusement.

The history of the Alexandra Palace is interesting. It was opened exactly 60 years ago as a northern rival of the Crystal Palace, which stands on the southern hills bordering London. A fortnight after its opening it was burned out. Shortly after it had been rebuilt it was compelled to close owing to lack of funds, and remained closed for nine years.

For 20 years following, it had fitful bursts of enterprise. At length money was subscribed to save the park from falling to the speculative house builder. The park, which extends to almost 200 acres, was a valuable acquisition, but nobody ever has been able to do anything effective with the great sprawling palace itself. During the war it made itself useful, first as a harbour for Belgian refugees, and later for German prisoners.

The only good thing in the Palace is the great organ. This was the masterpiece of "Father" Henry Willis. Music-lovers of North London a few years back contrived to find the money to make the organ as good as new, and week-end concerts at the palace have been popular.

#### Social Progress

##### Must Keep Pace With Scientific Advance, Says Hon. R. J. Manion

Social progress must keep pace with scientific advance in order to bring about an equitable distribution of the world's products, Hon. R. J. Manion, Minister of Railways and Canals, told the Canadian Electrical Association at their annual banquet at Lucerne-in-Quebec.

Dr. Manion urged that not only public but business men and scientists give serious thought to bringing about social reforms that would enable a greater number of the people to share the benefits of what they produce.

The minister made electrical development the theme of his address but touched also on the problems of the day and the world economic conference. It was inconceivable, he said, that the conference would fail to achieve its end. If there should be difficulties between the European nations and United States, Canada would be in an excellent position to act as an intermediary, Dr. Manion said, but he did not anticipate any such difficulties would arise.

He expressed the belief that the vast majority of people in Canada were opposed to the export of electrical power, not only because it was a direct loss to industrial possibilities in the Dominion, but because of the great difficulty in shutting off power from a friendly country once communities had been built up in the power exporting area.

#### Cypress Hills Park

##### Highest Elevation Of Any Part Of Saskatchewan

Cypress Hills Park, the Highlands of Saskatchewan, will be officially opened this year. This is 20 miles south of Maple Creek and has the highest elevation of any part of the Province of Saskatchewan. Some of the streams in the park flow south to find the Missouri River and some flow north to join the Saskatchewan River and then on to Hudson Bay. The main park is 4,500 feet above sea level and part of it is even higher than Banff, the famous mountain resort in Alberta. New buildings in the park include one lodge with 18 large rooms and a number of log cabins.

#### Tax-Free Bond Ruling

The exchequer offered by our young women tourists when caught speeding are certainly lame and hackneyed complaints a correspondent of the Manchester Guardian.

Why not emulate a girl friend in San Francisco, who declared truth positively radiating from her big blue eyes, that she thought a fire engine was behind her, and that it was up to her to hurry to get out of the way. She was chased by motorcycle policemen, and did not stop until two shots had been fired by them. Why are not our own traffic police encouraged by "the Yard" to tackle their job in this modern and virile way? At least a machine-gun might be stationed at busy spots along bypass roads during summer weekends to increase respect for the law, even if it were to fire only blank.

#### Ingenious Excuse For Speeding

##### Thought Fire Engine Was Coming Said San Francisco Girl

The excuses proffered by our young women tourists when caught speeding are certainly lame and hackneyed complaints a correspondent of the Manchester Guardian.

An historian announces that women used cosmetics in the Middle Ages. Women still use cosmetics in the middle ages.

More than 10,000 Alberta silver fox furs were placed on sale at the first annual sale of pelts in London this year.

## Sees World Wheat Surplus And Believes Curtailment Of Production Is Only Solution

In the April issue of Canadian Business, written under the pen name of John Macfarland, an authority on the wheat situation had an article in which, after analyzing the situation as he saw it, he reached the conclusion that no real evidence exists of a world surplus of wheat. In the current issue of this organ the Canadian Chamber of Commerce, John L. McFarland, general manager of the Canadian Co-operative Producers Limited, makes a spirited reply, to which he questions the basis of this conclusion, puts forth figures to indicate that there is a surplus and argues the need of acreage reduction.

Mr. McFarland states that statistics show that the visible supplies of wheat had commenced to accumulate before the unusually good crop of 1928 and since its disposal they have continued to accumulate. He quotes the International Institute at Rome to the effect that wheat stocks will experience a further appreciable increase during the present season that exportable stocks will have risen from \$65 million on April 1 last year, to \$65 million by next August. Total international trade for this year, he states, is estimated to be somewhere between \$300 and \$344 million bushels, so that the exportable carryover surplus really represents 100 per cent. of the total international trade for a year. The surplus, he asserts, "becomes a quantity of paramount importance as a price making factor." Based on the present world's acreage and with average crops, he states, the world's surplus will continue to increase.

As regards the position of Canada, Mr. McFarland sets forth that before the war this country supplied about 13 per cent. of the world's international trade in wheat. Since then Canada has increased her acreage greatly. If this country continues its recent acreage and rape average yields per acre, it will appear necessary, says this authority, that Canada will have even closer to 50 per cent. of the world's trade in the pose of its crops. Does anyone believe, he inquires, that other countries are going to leave to Canada the privilege of supplying this pre-

portion? What is the solution for the conditions described? According to Mr. McFarland, the only method by which there may be any permanent advance in prices is by a world-wide reduction in acreage. In such a movement, he thinks, Canada should be a leader because in the past twenty years she has increased her acreage by a much greater percentage than any other exporting country. He goes on:

"The laws of Nature of the Acts of Providence might conceivably reduce production on this over-extented acreage, but such reduction can only be of a temporary nature, caused after all those laws, over a period of time, will make their arrangement. Therefore, it appears that there is only one way of permanently correcting the unsound conditions and that is by the actual reduction of acreage."

Mr. McFarland buttresses his contention with the statement that the United States has fed an unusually large quantity of wheat to animals during the last three years—a quantity sufficient for a year's world supply. He points to this as an answer to the people who say there is no over-production and that the problem is only one of underconsumption.

The viewpoint thus set out is the viewpoint of a large element in the West which favors agreement for curtailment of production and control of distribution.

### Rail-Bus Is Speedy

The "rail-bus," a new type of vehicle with a high-speed steam engine, has just been placed on the Brighton-Devil's Dyke line of the Southern Railway of England. It will accommodate 44 passengers, and in test runs has speeded over 60 miles an hour.

"What is the best thing to do when suddenly faced by an infarcted bus?" asks a correspondent about fifteen miles an hour.

W. N. U. 2600

### Canadian Mosquitoes

#### About Sixty Species Of This Pest Found In Canada

There are about sixty species of mosquitoes in Canada, many of which feed on the blood of man. Although the majority of them, particularly the kind known as Aedes, are most abundant in southern woods in certain seasons, as at present, as the result mainly of man-control, they often cause considerable annoyance indoors as well. Their attacks are most noticeable at dusk and in warm, dull, humid weather. In autumn and winter, also, complaints are frequently received of the presence of numbers of mosquitoes in cellars and basements. These mosquitoes are the hibernating females of the genera Culex and Anopheles which pass the winter as winged adults in protected situations. Attacks from them are rare. However, in many parts of Eastern Canada, the cosmopolitan house mosquito, known scientifically as Culex Pipiens, is now well established, especially in towns and cities, and in one large city has become a public nuisance. This species is found not only from dwellings which it enters freely, but particularly at night. Now householders and others can combat the mosquito nuisance is fully explained in "Mosquito Control in Canada," a pamphlet issued on request by the Dominion Department of Agriculture.

### World's Largest Zinc Mine

#### Sullivan Mine At Kimberley, B.C. Is the Largest Producer

The Sullivan mine at Kimberley, British Columbia, is the world's largest producer of zinc ore and one of the leading producers of the ores of lead and silver. This mine has produced a grand total of 1,596,153 tons of lead, 1,261,473 tons of zinc, and 55,184,466 ounces of silver since it began to operate in 1900, up to the end of 1932. Last year 1,441,945 tons of lead-zinc-silver ore were milled, as compared with 1,014,740 tons in 1931. The Sullivan is the source of nearly all the annual lead output for Canada, and of over 80 per cent. of the zinc production. Since 1925 it has held supremacy in the production of silver.

Fort Steele mining division, in which the Sullivan mine is located, has several other silver-lead and silver-lead-zinc properties, which in past years have made important contributions to the output. Many years ago this district was an important producer of placer gold, and interest in the placers prospects are again active, due to the present premium on gold. There are also in the Fort Steele area a variety of non-metallic minerals, such as gypsum and crystalline rock magnetics.

### No More Constantinople

#### City Now Called Istanbul and Is Not Turkish Capital

The first two things to remember about Constantinople nowadays is that it is not the capital of Turkey and that it is not called Constantinople. The capital is Ankara where the President-dictator, Mustapha Kemel, lives on his estate "Pinehill," and Constantinople is called Istanbul. It is a city with a million inhabitants and about fifty thousand starving dogs, some time ago they were taken off to a deserted island with no food or water, so that they all ate each other until the survivor died of thirst.

### One Great Advantage

School days being once more over there will be many boys and girls with nothing to do and no place to go. Here is where the farm presents advantages over city life. The farm boy or girl can be given some responsibility or some task that will be useful to them and not disadvantageous or costly to the parents. Farm youth do not have to spend their vacation days in idleness.—Farmer's Advocate.

### Used Discretion

When a herd of 36 elephants paid no attention to the furious blowing of a locomotive whistle as they leisurely crossed a railway track between Ewahswoyo and Gwelo, Africa, the engineer had to stop his train until they were out of the way.

To utilize surplus sugar Czechoslovakia is converting it, mixed with bran and other ingredients, into fodder for horses, cattle and pigs.

By Ruth Rogers

### GOOD LOOKING HOME WEAR MAKES IMMENSELY—MAKES KITCHEN CHORES EASY

Every woman who wears clothes can't have too many home ensembles that will tub and tub and always come up smiling.

And today's model is just lovely. The dress is suitable for the house, garden, porch, marketing, etc. And incidentally, it's decidedly slimming to the heavier build. The diagonal hip seaming reduces bust.

The dress is dark blue and white dimity. The apron is white dimity used in the form of a short trim.

And? And it won't slip off the shoulders either, for the suspender straps are useful besides being attractive.

Design No. 910 includes the dress and the apron in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches. Price \$16.95-\$20.95 depending on fabric for dress with 1½ yards of 35-inch material for apron and dress collar.

Price of pattern 20 cents in stamp of coin (code is preferred). Wrap carefully.

### Distinguished Canadian Artist

#### Wild Flowers Lived Under British Of

1886 Robert Thorne

Three years ago Robert Holmes, artist, died. Alceo Wetherell writes of the painter of wild flowers in *The Challenger*: "One day in 1889 a young milliner of the Kawartha Lakes district, gave up trimming bonnets with artificial flowers, and settled down to housekeeping with her young husband in Cannington, Ontario. She planted seeds and bulbs and her garden became the best in the village. Not much wonder that wee Robert imbibed lots of beauty. It was therefore not so strange that when he drew pictures for the first number of the Art Student's League calendar, he should choose as his subject the back doorway to that house, his mother inside washing dishes and outside directly in her line of vision, the grapevine, the vines and the poppies masses against the walls.

"Not even remarkable that the lad, brought up with such a background, should finally become Canada's most distinguished painter of flowers, and the greatest painter in America of wild flowers in their native setting.

"The fireweed, loose stripe orchid and Indian pipe, in Holmes' water colors, are never stiff poses, but always seem to be growing in the woodland haunts where he found them. He alone seemed to have the power to put this subtle sense of life into what are usually regarded as 'still-life' pictures. Yet it took weeks of work to picture that spirit that made you smell the perfume and feel the breeze as he did.

"He was a student of the Royal Art Society and of the Royal College of Art in London. He chose Canadian wood flowers for his designing chiseles as a peculiarly native Canadian motif on which to base their work. With the words 'Flowers' on his lips he died, and according to his wish is buried in a little lot beside the woods where he often wandered as a boy."

### Want African Colony

#### Germany's Sixth Block For Expansion And Means To Pay Debts

Germany is asking the world for an African colony.

A memorandum prepared by Dr. Alfred Hugenberg, German minister of economics, for the economic committee of the world conference, said there were two possible ways of increasing Germany's capacity to meet her international debts—first, by giving her an African empire where large public works schemes could be carried through; or, second, by opening other new territories "to that people which has not enough space in which to live."

### Money From Trees

Australia, strange as it may seem, is teaching its young people that money grows on trees. Under adult guidance, state school children of Victoria have cut out 4,000 acres of mulberry bushes—worth \$5,000,000 on maturity. Profits from the sale of bark and timber will be used to provide scholarships, libraries, radio and sports materials—Christian Science Monitor.

### AFTER THE RECORD HOP FROM SPAIN

Showing HERE effects of the strain of their nonstop flight, Captain Mariano Barberas (left) and Lieutenant Joaquin Colomer, Spanish Army fliers, are shown at Camaguey, Cuba, on the completion of their record flight from Seville, Spain, to the plane "Cuatro Vientos" (top). Their route took them over 4,000 miles of ocean.

## Present Year Marks The Diamond Jubilee Of The Royal Canadian Mounted Police

### Price Of High Living

#### Famed Embassy Club Cat Killed By Rich Food

Jackson the "High Life" cat, the most famous cat in Mayfair, and perhaps in the world, is dead.

Felix, the phantom of the movies, could not hold a candle to Jackson. He was an aristocrat. Jackson paid court to him and he seldom deigned to notice him.

Jackson was the mascot of the Famed Embassy Club in London's Regent Street. He figured in novels, caricatures and innumerable gossip columns.

Now like other martyrs to the cause of High Life, he died of acute indigestion at the comparatively early age of eight.

It is impossible to estimate how much smoked salmon, foie gras, leg of chicken and caviare he ate in the eight years he associated with the elite who passed through the portals of the Embassy Club.

Guests after distinguished guests tried to pay court to him with tidbits. Often he turned disdainfully away, but not often enough. It got him in the end.

"He was a student of the Royal Art Society and of the Royal College of Art in London. He chose Canadian wood flowers for his designing chiseles as a peculiarly native Canadian motif on which to base their work. With the words 'Flowers' on his lips he died, and according to his wish is buried in a little lot beside the woods where he often wandered as a boy."

Who Owns Canada?

The question which appears as the heading of this article was included in examination papers recently submitted to pupils in Montreal schools under the jurisdiction of the Catholic School Commission of that city. Answers to the question revealed such vague and uncertain knowledge regarding the status of the Dominion that the Commission appealed to the Secretary of State at Ottawa for an authoritative definition of Canada's status within the British Commonwealth of Nations, and among the world of nations.

The answer, given over the signature of Hon. C. H. Cahan, Secretary of State, was to the effect that the British Commonwealth of Nations. It sets forth that Great Britain does not own Canada any more than Canada owns Great Britain; that Canada and Great Britain are each independent members of the British Commonwealth, and that the Dominion belongs to the people of the Dominion.

This answer should set at rest a large amount of uncertainty among Canadians regarding the official status of the land of their birth. It was evident from the answers submitted in the school examinations at Montreal that the subject had not been sufficiently emphasized by the teachers, and the secretary of the Catholic School Commission has stated that in future more attention will be paid to it. It would be well if this was done, not only in the Catholic schools of Montreal; but in all schools throughout the Dominion.

Canada is today an absolutely free and independent nation—just as much so as any other nation in the world. The King of Canada is George V. He is also King of Great Britain, King of Australia, Emperor of India. In Canada the King is represented by the Governor-General, who is appointed by the King on the advice of the Government of Canada. At one time the Governor-General was appointed on the advice of the Government of Great Britain, but now he is appointed by the Canadian Government, while the British Government is represented in Canada by a Commissioner in the same manner as the United States, France and Japan are represented by Ministers, and Canada is represented in Great Britain by a Commissioner; just as other countries are represented there by Ambassadors and Ministers.

The term and status of "Commissioner" is employed between two Dominions of the British Commonwealth because each have a common sovereign and such a sovereign does not send an Ambassador or Minister to represent him to himself as he does to represent him to other sovereign nations. The Crown being represented in the person of the Governor-General, the King's several governments are represented the one to the other by Commissioners.

The question may be asked: If Canada is an independent, fully self-governing Dominion of the British Commonwealth of Nations, why does it not enjoy the power to amend its own constitution, and why are appeals taken from decisions of the Supreme Court of Canada to the Privy Council in Great Britain? Other nations, it may be urged, have power to amend their own constitutions, and their Supreme Courts are final courts of appeal.

The answer is, that Canada can exercise those powers whenever the people of Canada desire to do so, and probably the time will come when Canada will decide to do so. Canada has preferred to retain to itself the right of carrying judicial appeals to the impartial tribunals of the Privy Council, especially in all matters in dispute between the Federal and Provincial Governments. There is no compulsion that it should do so, and it can refrain from doing so, or can abrogate that right should it deem it wise to do so.

So, too, in regard to amendments to the Canadian constitution. The B.N.A. Act created a confederation of Provinces, reserving to the Dominion certain exclusive powers on the one hand and certain other exclusive powers to the Provinces on the other hand, while in regard to some matters jurisdiction was divided between the two authorities. The Provinces, therefore, have as much right as the Dominion itself to say when and how the constitution shall be amended, and up to the present time certain of the Provinces have preferred to leave the matter as it was at the time of Confederation, with the British Parliament making such amendments to the constitution of Canada as the Parliament of Canada, with the consent of the Provinces, may request. But Canada can secure full and final control over its own constitution if and when the people so desire.

So, the complete and final answer to the question: "Who Owns Canada?" brings us back to the definition given by the Secretary of State. Otherwise the question belongs to the people of the Dominion. They are masters of their own national destiny. Nobody can tax them but themselves; they pay tribute to no other nation. Canada can make its own treaties with other nations irrespective of the effect such treaties may have upon other Dominions of the British Commonwealth.

But, because the Dominion belongs solely to the people of the Dominion, the great responsibility rests upon them as citizens of a sovereign nation among the nations, with absolute equality in the League of Nations, to so govern themselves, and to so conduct their national and international relationships, as to command the respect of and wield a great influence for good in the world. There should be no spirit of a narrow nationalism in Canada; quite the reverse.

### Mayors Are Youthful

The new mayor of Detroit is 31 years old and everyone is commenting on the fact that he is extremely youthful to be assuming such a heavy responsibility. We should like to point out that the mayor of Windsor is but 33 years old, and that he is now well into his second term. He was 30 when he took on the job and, furthermore, he had had no aldermanic experience. —Border Cities Star.

Of course women are vain creatures who like to be looked at but you've noticed who does the most marching in parades.

### Summer Complaint Plays Havoc With the Bowels

Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months. You cannot tell when it seizes you how it is going to end, let alone what it leaves you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

### Chemical Products

**Depression Does Not Seem To Affect Demand For Toilet Preparations**  
It is evident from the study of the recently issued preliminary report on the production of chemicals and allied products in Canada in 1932 that the depression has practically no effect on the demand for toilet preparations. In 1928 the selling value of these preparations at the plants where they were made was \$4,618,291. In 1931 the value of the output had risen to \$5,946,292 and in 1932 was \$5,073,134.

### HAD RHEUMATISM FOR 20 YEARS

#### But None Since 1930

This man must have something like a record for suffering. He says: "Since 1910 up to 1930 I had 20 years of rheumatism. I am a great sufferer with rheumatism. I am pleased to say that since 1930 up to date, I have been free from that dreadful pain, simply by taking a few drops of this medicine every day. I must say that 20 years is a long time to have that awful rheumatic pain about one." —W. P.

You can see how this man is like his average sister's. It is caused by sharp-edged uric acid crystals getting into your joints. Kruschen will dissolve those crystals away. Furthermore, it is up to you to take it daily dose; ever afterwards, it will never be possible for them to form again. Rheumatism will be gone for good.

### Joy-Riding By Air

#### New York People Have Money For Extravagant Notions

Last night the staff of St. Hubert Airport, near Montreal, had word that an airplane was coming in, and they turned on the beacons and lights.

At 12:30 midnight the "plane arrived from Roosevelt Field, New York. There alighted two men and a woman, in evening clothes. A taxi-cab was waiting, and it hurried them away to Montreal.

Just before four o'clock the party returned, boarded the "plane, and were back in New York for an early breakfast.

Thus between sunset and morning these people travelled to Montreal, had three hours in that city, flew home in time for work. The cost of the trip was about \$500. If the incident has a moral, it is that in New York still have money for extravagant notions—and that the new boy has not destroyed the strong attraction of Montreal for its wealthy neighbors—Ottawa Journal.

### Use Of Anti-Toxin

#### New Treatment Of Diseases Of Children Is Reported

New developments in treatment of two diseases of children, scarlet fever and whooping cough, were reported to the American Medical Association.

There is hope that it will be possible to immunize infants against whooping cough just as they are protected from diphtheria, by treating them with a vaccine, said Dr. Louis W. Sauer, of Evanston, Ill.

Tests showed, he said, that not one of the children he vaccinated contracted the disease.

Use of anti-toxin in cases of scarlet fever has been definitely shown to reduce severity of the disease and aid in rapid convalescence. Dr. Luke W. Hunt, of McCormick Institute for Infectious Diseases, Chicago, reported summarizing study of more than 2,000 cases.

The anti-toxin should be given within the first day or two after the patient becomes ill with scarlet fever, he said.

### Smashing the Atom

#### Powerful Hammer Devised By Scientists Accomplishes Feat

The most powerful hammer yet devised for smashing the centres, or cores, of atoms, which are believed to hold the secret of how all matter is built, was described before the American Association for the Advancement of Science.

This atom-smashing hammer is the deuton, the infinitely small but enormously powerful core of the heavier of the two atoms of hydrogen which is fired like a bullet into the cores of atoms that are to be smashed. Latest results of its use were reported by Drs. Gilbert N. Lewis, M. Stanley Livingston and Ernest O. Lawrence of the University of California.

### Removed Half Of Brain

Removal of almost all of the right half of a woman's brain with an inoperable tumor on her mortality and nearly partial paralysis on the left side was reported to the American Medical Association. Twenty months after the operation, Dr. Gardner said, "examination disclosed no change in intellect."

The Irish Free State expects many visitors from America this summer.

### Permanent Exhibition Planned For London

#### Alexandra Palace May Be Turned Into Amusement Place

There is a prospect of London being endowed with a permanent "Wembley Exhibition." The Alexandra Palace, on the northern heights of London, Eng., which has long been the despair of all concerned with it, has been taken in hand by no fewer than 18 local authorities, who have recommended grants for its modernization which will amount to \$1,000,000. It is proposed the Palace shall be so renovated as to convert it into a first-rate place of exhibition and general amusement.

The history of the Alexandra Palace is a dreary one. It was opened exactly 60 years ago as a northern rival of the Crystal Palace, which stands on the southern hills bordering London. A fortnight after its opening it was burned out. Shortly after it had been rebuilt it was compelled to close owing to lack of funds, and remained closed for nine years.

For 20 years following, it had fitful bursts of enterprise. At length money was subscribed to save the park from falling to the speculative house builder. The park, which extends to almost 200 acres, was a valuable acquisition, but nobody ever has been able to do anything effective with the great sprawling palace itself. During the war it made itself useful, first as a harbour for Belgian refugees, and later for German prisoners.

The only good thing in the Palace is the great organ. This was the masterpiece of "Father" Henry Willis, Music-lover of North London a few years back contrived to find the money to make the organ as good as new, and week-end concerts at the palace have been popular.

### Social Progress

#### Must Keep Pace With Scientific Advance, Says Hon. R. J. Marion

Social progress must keep pace with scientific advance in order to bring about an equitable distribution of the world's products, Hon. R. J. Marion, Minister of Railways and Canals, told the Canadian Electrical Association at their annual banquet at Luton-in-Quebec.

Dr. Marion urged that not only public men but business men and scientists give serious thought to bringing about social reforms that would enable a greater number of the people to share the benefits of what they produce.

The minister made electrical development the theme of his address but touched also on the problems of the day and the world economic conference. It was inconceivable, he said, that the conference would fail to achieve its end. If there should be difficulties between the European nations and United States, Canada would be in an excellent position to act as an intermediary, Dr. Marion said, but he did not anticipate any such difficulties.

He expressed the belief that the vast majority of people in Canada were opposed to the export of electrical power, not only because it was a direct loss to industrial possibilities in the Dominion, but because of the great difficulty in shutting off power from a friendly country once communities had been built up in the power exporting area.

### Cypress Hills Park

#### Highest Elevation Of Any Part Of Saskatchewan

Cypress Hills Park, known as the Highlands of Saskatchewan, will be officially opened this year. This park is 20 miles south of Maple Creek and has the highest elevation of any part of the Province of Saskatchewan. Some of the streams in the park flow south to find the Missouri River and some flow north to the Saskatchewan River and then to the Hudson Bay. The main park is 4,500 feet above sea level and is 10,000 feet higher than Banff, the famous mountain resort in Alberta. New buildings in the park include one lodge with 18 large rooms and a number of log cabins.

### Tax-Free Bond Ruling

Tax-free Victory bonds forfeit that exemption when they are paid out by a company to its shareholders in the form of dividends. This was the judgment of the supreme court of Canada, Mr. Justice Lamont dissenting, on an appeal taken before it by D. J. Waterous of Brantford. The judgment dismissed the appeal with costs.

Ogden's Fine Cut and "Chancery" papers... that's a combination worth trying to! Any man who's tried it will tell you it's a guarantee of really better and more satisfying cigarettes.

### OGDEN'S FINE CUT

*Your Pipe Knows Ogden's Cut Plug*

### Ingenious Excuse For Speeding

Thought Fire Engine Was Coming

Said San Francisco Girl

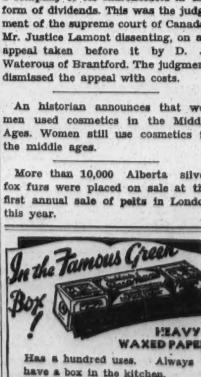

The excuses proffered by our young women motorists when caught speeding are curiously lame and hackneyed. One is that she was in a hurry to get out of the way. She was chased by motorcycle policemen, and did not stop until two shots had been fired by them. Why are not our own traffic police encouraged by the "Yard" to tackle their job in this modern and virile way? At least a machine-gun might be stationed at busy spots along bypass roads during summer months to increase respect for the law, even if it were to fire only blank.

W. N. U. 2000

## Sees World Wheat Surplus And Believes Curtailment Of Production Is Only Solution

In the April issue of Canadian Business, writing under the pen-name of John Marquis, an authority on the wheat situation had an article in which, after analyzing the situation as it now stands, he reached the conclusion that no real evidence exists of a world surplus of wheat. In the current issue of this organ of the Canadian Chamber of Commerce, John L. McFarland, general manager of the Canadian Co-Operative Producers Limited, makes a spirited reply, in which he questions the basis of this conclusion, puts forth figures to indicate that there is a surplus and argues the need of acreage reduction.

Mr. McFarland states that statistics show that the visible supplies of wheat had commenced to accumulate before the unusually good crop of 1928 and since its disposal they have continued to accumulate. He quotes the International Institute at Rome to the effect that wheat stocks will experience a further appreciable increase during the present season, that exportable stocks will have risen from \$64 millions on August 1 last year, to \$90 millions by next August. Total international trade for this year, he states, is estimated to be somewhere between \$90 and \$94 million bushels, so that the exportable carryover surplus really represents 100 per cent of the total international trade for a year.

The author adds, "becomes a quantity of paramount importance as a price making factor." Based on the present world's acreage and with average crops, he states, the world's surplus will continue to increase.

As regards the position of Canada, Mr. McFarland sets forth that before the war this country supplied about 12 per cent of the world's international trade in wheat. Since then Canada has increased her acreage greatly. If this country continues its recent acreage and reaps average yields per acre, it will appear necessary, says this authority, that Canada must acquire very close to 50 per cent of the world's trade to dispose of its crops. Does anyone believe, he inquires, that other countries are going to leave to Canada the privilege of supplying this portion?

What is the solution for the conditions described? According to Mr. McFarland, the only method by which there may be any permanent advance in prices is by a world-wide reduction in acreage. In such a movement, he thinks, Canada should be a leader because in the past twenty years she has increased her acreage by a much greater percentage than any other exporting country. He goes on:

"The Laws of Nature of the Acts of Providence might conceivably reduce production on this over-extended acreage, but such reduction can only be of a temporary nature, because after all these laws, over a period of years, will make their averages. Therefore, it appears that there is only one way of permanently correcting the unsound conditions and that is by the actual reduction in acreage."

Mr. McFarland buttresses his contention with the statement that the United States has fed an unusually large quantity of wheat to animals during the last three years—a quantity sufficient for a year's world supply. He points to this as an answer to the people who say there is no over-production and that the problem is only one of underconsumption.

The viewpoint thus set out is the viewpoint of a large element in the West which favors agreement for curtailment of production and control of distribution.

### Rail-Bus Is Speedy

The "rail-bus" a new type of vehicle with a 100-horsepower steam engine, has just been placed on the Brighton-Devil's Dyke line of the Southern Railway of England. It will accommodate 48 passengers, and in test runs has sped over 80 miles an hour.

"What is the best thing to do when suddenly faced by an infarcted bull?" asks a correspondent. About fifteen miles an hour.

W. N. U. 2000

### Canadian Mosquitoes

#### About Sixty Species Of This Pest Found In Canada

There are about sixty species of mosquitoes in Canada, many of which are found on the blood of man. Although the majority of them, particularly the kind known as Aedes are most troublesome in field and woodland, in certain seasons, as at present, as the result mainly of non-control, they often cause considerable annoyance indoors as well. Their attacks at dusk, and in warm, dull, humid weather, in autumn and winter, also, complaints are frequently received of the presence of numbers of mosquitoes in cellars and basements. These mosquitoes are the hibernating females of the genera Culex and Anopheles which pass the winter as winged adults in protected situations. Attacks from them are rare. However, in many parts of Eastern Canada, the cosmopolitan house mosquito, known scientifically as Culex Pipiens, is now well established, especially in towns and cities, and in one large city has become a public nuisance. This species is not found far from dwellings which it enters freely, biting particularly at night. How householders and others can combat the mosquito nuisance is fully explained in "Mosquito Control in Canada," a pamphlet issued at request by the Dominion Department of Agriculture.

### World's Largest Zinc Mine

**Sullivan Mine** At Kimberley, B.C.  
Is the Largest Producer

The Sullivan mine at Kimberley, British Columbia, is the world's largest producer of zinc ore and one of the leading producers of the ores of lead, copper and silver. Since then Canada has increased her acreage greatly. If this country continues its recent acreage and reaps average yields per acre, it will appear necessary, says this authority, that Canada must acquire very close to 50 per cent of the world's trade to dispose of its crops. Does anyone believe, he inquires, that other countries are going to leave to Canada the privilege of supplying this portion?

What is the solution for the conditions described? According to Mr. McFarland, the only method by which there may be any permanent advance in prices is by a world-wide reduction in acreage. In such a movement, he thinks, Canada should be a leader because in the past twenty years she has increased her acreage by a much greater percentage than any other exporting country. He goes on:

The viewpoint thus set out is the viewpoint of a large element in the West which favors agreement for curtailment of production and control of distribution.

**No More Constantinople**

**City Now Called Istanbul and Is Nas Turkish Capital**

The first two things to remember about Constantinople nowadays is that it is not the capital of Turkey and that it is not called Constantinople. The capital is Ankara where the President-dictator, Mustapha Kemal, lives on his estate "Pinecliff" and Constantinople is called Istanbul. It is a city with a million inhabitants and about fifty thousand starving dogs, but some time ago they were taken off to a deserted island with no food or water, so that they all ate each other until the survivor died of thirst.

**One Great Adventure**

School days being once more over there will be many boys and girls with nothing to do and no place to go. Here is where the farm presents advantages over city life. The farm boy or girl can get away from the responsibilities of work that are useful to them and not disadvantageous or costly to the parents. Farm youth do not have to spend their vacation days in idleness—Farmer's Advocate.

### Used Direction

When a herd of 36 elephants paid no attention to the furious blowing of a locomotive whistle as they leisurely crossed a railway track between Botswana and Gwelo, Africa, the engineer had to stop his train until they were out of the way.

To utilize surplus sugar, Czechoslovakia is converting it, mixed with bran and other ingredients, into fodder for horses, cattle and pigs.

### GOOD LOOKING HOME WEAR MAKES IMMENSELY—MAKES KITCHEN CHOICES EASY

Every woman knows she can't have too many home ensembles that will suit tub and always come up smiling.

And today's model is just lovely. The dress is suitable for the house, garden, porch, marketing, etc. And wonderfully, it's easily slimming to the heavier build. The diagonal hip seaming reduces bulk.

The dress is dark blue and white which is perfect for the dress trim. And isn't the one-piece apron attractive? And the wooden slips, of course, are slender, from the suspender straps are useful beads helping modish.

Design No. 910 includes the dress and the apron in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34 and 36 inches. Size 16 requires 8½ yards of fabric and 1½ yards for dress with 1½ yards of 36-inch material for apron and dress collar.

Price of pattern 20 cents in stamps or coin (toilet is preferred). Wrap coin carefully.

## WORLD HAPPENINGS BRIEFLY TOLD

The 50,000 employees of the General Electric Company in its plants in various parts of the United States will receive a five per cent. increase in wages effective July 1.

After serving as organist of Christ Church, Highbury, for 53 years, and breaking all records for length of service as organist in England, Miss M. Cooper, aged 83, has retired.

Ko Ishii has been appointed Japanese consul for western Canada with headquarters in Vancouver and will arrive this month. He succeeds T. Hachiya, who returned to Tokyo, Japan, seven months ago.

Claire Zetkin, noted German Feminist and Communist, died unexpectedly at a sanatorium at Archangelskoye, near Moscow. In another month she would have been 76 years old.

Services of an internationally known detective agency will be used by the Toronto library board to recover books loaned and not returned. The agency will receive 25 cents for every book it retrieves.

The British Government has announced that the King has approved the appointment of Lieut.-Col. P. R. Laurie to be assistant commissioner of the Metropolitan Police, succeeding Major Maurice Tomlin, who has been retired on pension.

Princess and Florence Colliers of the Nova Scotia Steel and Coal Company were hoisting coal for the first time since the miners refused two months ago to work under wage reductions. They accepted a compromise wage scale.

Vancouver offices of the United States Department of Commerce have been closed. Greatly reduced appropriations for the commerce department are responsible. The only commerce office now left open is in Ottawa.

Agricultural department officials foresee a re-opening of the market for Canadian cattle in New York state, practically closed since Oct. 1, 1932, when an order went into effect requiring cattle imported into that state be certified free from Bang's disease.

The death of Senator Paradis brings the list of senatorial vacancies to nine, the largest number of unfilled seats in the red chamber for any one time; Saskatchewan, Ontario, New Brunswick and Quebec are each short two senators, while Nova Scotia has one appointment to be made.

## Adventure In North

### Boys From Honolulu On Scientific Quest In Alaska

Ten boys from Honolulu, ranging in age from 14 years to 17 years, started from Vancouver for a summer of scientific research and adventure in northern Canada and Alaska.

They will proceed to Skagway and go into Whitehorse where they will build boats for a run down the Yukon River to Dawson, Fort Yukon and Tanaana. They will rough it until August, arranging an estimated total of 1,600 miles. They will collect botanical specimens for the University of California and do some prospecting.

Bayne Beauchamp is in charge of the expedition.

## Auto Production

### May Production in United States Highest in 22 Months

May production of motor vehicles by member companies of the United States Automobile Chamber of Commerce was the highest in 22 months, according to a preliminary report.

Output totaled 172,883 units, a gain of 23 per cent over April and of 51 per cent over May, 1932. Production for the first five months of this year, on the basis of this estimate, amounted to 605,739 units as against \$84,505 in the same 1932 period.

The organization includes all major producers except the Ford Company.

## For Canadian Cattle Trade

At the request of the Department of Trade and Commerce the Dominion Steamship line has specially equipped the steamer "Nevisland" for the cattle trade. The vessel, first of her line to engage in the Canadian trade for over eight years, sailed from Montreal with 536 head of Canadian cattle for Cardigan together with 130,000 bushels of Canadian grain and a general cargo.

Many of London's 32,000 factories are resuming operations.

## A Strange Assignment

Dr. O'Neill Returns From Africa Where He Exhibits For the Chicago Fair

Returning from what is perhaps one of the strangest assignments ever given to a man, Dr. Edward P. O'Neill, Chicago, arrived in Montreal on the Cunard liner "Aurania." Dr. O'Neill has been acting on behalf of the Chicago World Fair Authorities and has just returned after a tour through Abyssinia to the Cape in search of interesting types of various tribesmen throughout the Dark Continent.

He has also collected a large number of examples of primitive art and workmanship. After some months of ceaseless travel in Africa, Dr. O'Neill has come back interested in an assortment of natives and their characteristic work as has probably ever been got together for exhibition purposes. The natives, he says, are primitive together with the exhibition material are coming on the Cunard liner "Aurania." The natives are traveling in small groups accompanied and are expected to arrive in their native dress when they will probably create something of a furor.

Dr. O'Neill is a medical practitioner but in view of his previous experience as an explorer in Africa he was engaged by the Chicago World Fair to collect material for the exhibition of Africa. The offer was made somewhat belatedly, Dr. O'Neill explained in an interview on arrival, and he did not have time to make his arrangements with individuals complete. He found that the British Government and the Belgian Government whose rule extends over many sections of central Africa, which he located the most interesting tribes, refused permission to allow natives to be used for exhibition purposes. There was no such objection, however, from French Government, and Dr. O'Neill was able to obtain a large variety of specimens of various types in the Cameroons, Portuguese Africa and other sections in Central Africa.

Dr. O'Neill's original trip was to London, England, thence to Vancouver by steamer, whence he traveled to the Imperial Express train direct to Paris with the customary stops at places like Bulawayo and Nairobi, afterwards proceeding from Paris to the Alpine capital of Austria. Every facility was given him to obtain native works of art before he proceeded south through other regions.

The young passenger on the "Aurania" was certainly B. Greene, who is making a rush trip to Canada.

Mr. Greene is six feet eight inches tall and claims to be the shortest and tallest member of a family. The birth in his cabin, made for passengers of more modest dimensions, was able to accommodate his enormous figure.

Mr. Greene comes of a famous family of tall men and claims he can trace his ancestry back two or three centuries.

Alfred Greene arrived in Canada from Brazil, and is now the owner of a garage in England.

## Recipes For This Week

(By Betty Barclay)

### HUNGARIAN CHOCOLATE FROSTING

(Using egg yolks)

2 squares unsweetened chocolate, cut in pieces,

1/4 cup tablespoons hot water.

1/4 cup confectioners' sugar.

2 egg yolks, well beaten.

1/2 cup butter, washed in cold water to remove salt.

Melt chocolate in double boiler, add hot water, and blend. Add sugar and egg yolks, and beat well. Remove from fire and allow mixture to stand over hot water 3 minutes until slightly thickened, stirring constantly. Cool quickly to lukewarm.

Add butter, a tablespoon at a time, blending after each addition. Makes enough frosting to cover top and sides of 8 x 8 x 2-inch cake, or tops of two 9-inch layers.

Note: This is a small recipe. Double the recipe for enough frosting to spread between layers and on top and sides of three 9-inch layers.

### HAM LOAF

6 hard boiled eggs.

2 cups cooked ham, chopped fine.

1 cup milk.

1 tablespoon flour.

1 teaspoon Worcester sauce.

1 teaspoon sugar.

1 teaspoon mixed mustard.

Salt and pepper.

Make a white sauce of the flour and milk. Add seasonings.

Arrange a layer of the sliced, hard boiled eggs in the bottom of a baking pan. Pour on a little of the sauce.

Add a layer of the ham. Cover with sauce. Continue alternating layers until all is used. Cover top with well-buttered bread crumbs. Bake thirty minutes in a moderate oven.

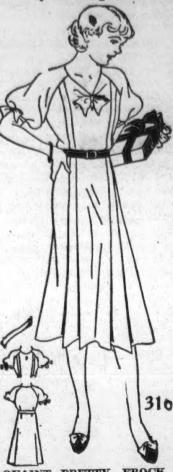

A girl can always tell when a man is in love with her by the way he looks at her when she isn't looking.

A QUAIN PRETTY FROCK IS THIS WITH ITS BOWS—PUFFED SLEEVES

Isn't it attractive? The raglan and puffed sleeves are so youthful and pretty smart. And the plaited arrangement at the front is most attractive with its long bows.

Carrot-red crinkly crepe silk is as smart as can be the original.

A crepe silk print in pink dot in blue and white is combined with white crepe used for the sleeves and worn with a white leather belt.

Style No. 316 is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 2 1/4 yards of 39-inch material.

Price of pattern 20 cents in stamp or coin (coin is preferred). Wrap carefully.

# FRANCO-U. S. TROUBLE WAS SOON ADJUSTED

London, Eng.—The secret meeting at which Franco-American differences were adjusted provided the most dramatic incident since the inception of the world economic conference. The meeting was held in a private room in a secluded part of conference headquarters.

Prime Minister Ramsay MacDonald, president of the conference, knew the full import of the meeting. Veteran of innumerable international conferences, he remained alone in an adjoining room, pacing the floor, his hands clenched. Back and forth, back and forth he walked, his silvered head bent toward the door, listening for the knock which would mean that the conference was saved or that it had collapsed.

When Mr. MacDonald was informed, his face lit up with joy.

At a press interview Correll Hull, the United States delegation leader, declared that undue emphasis had been placed on temporary currency stabilization and that the United States deems such action now "unnecessary."

## Snow Slide Victim

Find Bodies Of Two Men Lost Since Last February

Field, B.C.—One hand jutting above rock and melting snow had led to discovery of Cris. Dean, 26, and his brother, Joe, 23, lost in Duchesne Pass since last February.

The young men, both residents of Banff, Alberta, were tramped in snowdrifts in the pass as they attempted a ski journey from Camp Hector to Field, 30 miles through winding passes. Work parties will leave here to dig the bodies out of the debris.

Discovery of the bodies was made by two Swiss guides, Rudolph Ammer and C. Haesler, who were conducting a search of the pass. Searches have been made intermittently since the young men disappeared, a brother Frank, 20, making trips through the area at every opportunity.

Parents of the young men reside at Banff.

## Famous Racing Motorist Dead

Sir Henry Birkin Was Victim Of Blood Poisoning

London, Eng.—Despite a desperate battle by doctors, Capt. Sir Henry Birkin, 36, a famous racing motorist, died in a London nursing home from the effects of blood poisoning resulting from burns received in the Tripoli Grand Prix in May.

Sir Henry had been critically ill for three weeks, and three blood transfusions were tried.

He had become one of Great Britain's leading drivers since 1927.

Sir Henry Birkin was born July 26, 1896. He succeeded his father to the baronetcy in 1931. It was created in 1905. He served in the war from 1914 to 1918.

## Trouble Over Taxes

Ten People Reported Killed In Blots In Poland

Warsaw, Poland.—Nine persons and one policeman were officially reported killed when police forced peasants to cease beating tax collectors in the Galician districts of Ropica, Krosno, and Lancut. Sixteen persons were seriously wounded. Many arrests were made and numerous peasants escaped to the forests.

**Grasshopper Invasion**

Winnipeg, Man.—Thirty thousand acres of green crops in Winnipeg municipality, southwest Manitoba, were threatened with destruction by an invading horde of grasshoppers as western Canada's wheat lands baked by a searing sun during last week's heat wave, failed to receive the much-needed moisture promised.

**Theft From Mint**

Ottawa, Ont.—John R. Wallace, a member of the Royal Canadian Mounted Police, pleaded guilty in police court here to stealing \$65 in gold coins from the Canadian mint. He was remanded for sentence.

**Honors For Einstein**

Brussels, Belgium.—The University of Brussels recently conferred upon Prof. Albert Einstein the title Doctor Honoris Causa of the faculty of sciences.

W. N. U. 2000

## Aids To Navigation

### To Install Direction Finding Stations In Hudson Bay Area

Ottawa, Ont.—Paving the way for renewed efforts to reduce insurance rates on the Hudson Bay route, the federal marine department will shortly commence construction of a short wave direction finding station at Chesterfield, on the east shore of the bay, a considerable distance north of Churchill.

Installation of additional navigation lights in the strait will be undertaken this year. The department has funds for this purpose and, in addition, further survey work is necessary to determine the precise location of the points at which lights would be erected.

It is necessary to be able to mark all lights on navigation charts with absolute accuracy so that navigators when they see a light may fix their position. Hitherto a detailed hydrographic survey of the north shore of the strait has not been carried out and if lights were built this year only approximate positions could be given.

The direction finding station at Chesterfield is deemed the most important contribution to the Bay route that may be made at this time. This station will give cross bearings on the line from Nottingham Island to Churchill. At the present time there are stations at Nottingham and Churchill, but bearings are difficult to obtain.

This is the official reaction of the marine department to the annual report of the Imperial Shipping committee on the Hudson Bay route.

## Aeroplane Tragedy

### Capt. Broach and Two Mechanics Lose Lives In Air Crash

Prince Albert, Sask.—The first aeroplane tragedy of the year in northern Saskatchewan claimed the lives of three men near the Brooks air base at Emma Lake, 30 miles north of here.

The dead are: Capt. B. W. "Bill" Broach, pilot, 42; Hiram C. Brooks, pilot-mechanic, 24; T. D. Forsyth, mechanic, 28.

Broach, well known western commercial flier, who served with the Royal Flying Corps in France and later with the famous Dover patrol, was testing a reconditioned Biplane at an altitude of 2,000 feet. With him were Brooks and Forsyth, mechanics of the Brooks Airways, Prince Albert.

In the middle of their tests the plane dropped in a spin for some unknown reason and plunged into a bay of the lake just north of the air base, at 4 o'clock in the afternoon, after the machine had been put into several spins and loops by the pilot. The plane falling into about 10 feet of water, was smashed to pieces and the engine buried in the bottom of the lake.

The bodies of Broach and Forsyth were recovered shortly after the accident. Brooks' body had not been recovered, though being dragged for the third body.

Forsyth, mechanic, was scarcely recognizable, while Broach's head was badly smashed. Brooks was the son of R. D. Brooks, of Prince Albert, president of Brooks Airways.

## Lord Montagu Is Fined

### Found Guilty Of Common Assault On John Forbes

Victoria, B.C.—Lord Edward Montagu, the second son of the Duke of Manchester, was found guilty of common assault on the person of John Forbes on June 15 and was fined \$20 and \$7 costs, or, in default, ten days in jail, by Magistrate George Jay in provincial police court here. C. W. Brooks, co-defendant, was found guilty of assault causing grievous bodily harm, and was fined \$50 and \$7 costs, or, in default, one month in jail. Montagu's fine was paid and he was freed.

**Organization Dissolved**

Berlin, Germany.—The Steel Helvetians' organization throughout the Rhineland has been dissolved its offices and homes closed, and other property temporarily seized. The dissolution was said to have become imperative in order to "cleanse the organization of Marxist and Communist elements, as well as bad political leaders, and preserve it as a non-political defense organization."

**Gulls Save Crops**

Wolfville, N.S.—Farmers who till the soil of the Grand Pre Meadows turned their eyes to fields white with the gulls of Fundy—gulls fattening on millions of grasshoppers which had threatened to ruin the

## Review Tariff

### Britain Asks Canada To Discuss Duties On Long List Of Articles

London, Eng.—Taking further advantage of the terms of the Canadian-United Kingdom trade agreement, signed at Ottawa, the United Kingdom asked Canada to review a long list of articles, with a view to revision. The Canadian tariff board is already preparing to review the duties on cotton and textile goods imported from Britain.

The trade pact signed at the Imperial Conference gives each country the right to seek revision in the scale of duties levied by the other on its goods.

## Taking Part In Gold Rush

### Many Indians Using Sailing Canoes To Reach North

The Pas, Man.—Fleets of sailing canoes, loaded to the gunwales with freight, and manned by Crees, are now drifting ahead of the breezes of the northern lakes, heralding the new summer's gold rush in God's lake.

The purr of the outboard motor is heard right across the hinterland. Even Indians, without the cash to secure outboards, have jumped into the "rush" with canoes, and are swinging paddles, oars and sweeps, as they freight their way into mineralized zones.

## PROPOSAL IS MADE TO REDUCE WHEAT ACREAGE

London, Eng.—The four-power wheat conference adjourned discussions on wheat production from Australia, Argentina, and Soviet Russia after formulating a tentative plan calling for reduced acreage and export.

News of extensive crop damage in Canada and a short crop in the United States caused delegates to believe the final position may be changed materially.

Stanley Bruce, Australian minister to the United Kingdom, asked that the conference produce some concrete proposal which he might transmit to Canberra for consideration of his government.

It was learned the limitation proposed as now constituted contemplates reduction of acreage by 15 per cent. for the year 1933 and that the program for the second year would be decided after the effects of the one-year reduction are seen.

Canada, the United States and Argentina were reported agreed with the Polish that small producers must be brought into any scheme if disaster is to be avoided.

The Soviet has not been brought into debate yet but some quarters were inclined to the view no enduring solution of the wheat problem would be possible without participation of Russia despite that country's short crop this season.

Limitation of production by reduced acreage and the curtailment of exports by a quota system among the nations are the main lines on which the conference is engaged, while at the same time urgently pleading for some agreement by importers on methods whereby they might save consumption.

The Daily Telegraph said it was informed the world economic conference will begin immediate discussion of a plan for reducing the world's wheat output by 15 per cent. and absorbing the total carry-over in two years.

## REPRESENTS CANADA

Dr. Frank D. Adams, Emeritus Vice-Principal of the Faculty of Applied Science and Logan Professor of Geology and Palaeontology at McGill University, who has been appointed to represent the National Research Council at the International Geological Congress which is to meet in Washington from July 22 to 29.

## Default On Payments Bars New Borrowing

### New Ruling In United States To Protect Bond Issues

Washington, D.C.—Foreign borrows, including governments, who default on their obligations to the United States, can borrow no more money within this country by bond issues or other securities, according to the specific terms of the new Federal Securities Act, known as the "blue sky" law.

A clause in the new act, passed by Congress, stipulates that if the securities offered to the United States "in order to make a public authority" such public authority must have "continued the full service of its obligations in the United States" in order to make a public offering of its securities within the republic.

Some other facts interesting to foreign governments or corporations wishing to sell securities in the republic are set forth in the new law follow:

Truthfulness and adequacy of the information furnished to purchasers of foreign securities under the act are made the direct responsibility of U.S. investment houses, floating them.

All data relative to the financial status of the government or foreign corporation for which funds are intended to be raised must be furnished by the agents in the United States to the federal trade commission.

Just as domestic securities, foreign securities must be registered with the federal trade commission.

## German Jews Need Help

### Opinion Of Man Who Investigated Conditions Created By Nazis

New York—Michael Williams, who investigated conditions in Germany for the American committee of the rights of religious minorities, said in an address that Nazi opposition to Jews "far exceeds any other persecution known in modern times."

If the Jews are to be rescued, it is their position is to be ameliorated in any important degree, it is vital that an international body be set up qualified to speak and act for the Jews of the world.

## Has Increased Staff

Welland, Ont.—With prospects of a bumper wheat crop in western Canada which would necessitate an increased demand for binder twine, the Plymouth Cordage Company's plant here has taken on an additional 150 men.

## DISTINGUISHED FIGURES IN WORLD CONFERENCE

Canadians occupy a prominent place in the World Federation of Education Associations which is to hold its fifth Biennial Conference in Dublin, Ireland, this month. It will bring together outstanding educational leaders from forty or more countries with the object of cultivating and developing international good will and exchanging views on educational matters. The Dominion is represented by Harry Chesserworth (center), Vancouver, B.C., as vice-president of the organization; Dr. E. A. Hardy (right), Toronto, as Treasurer, and Dr. D. McDonald (left), Toronto, a member of the board of directors.

## Cannot Help Manitoba

### Federal Minister Of Trade And Commerce Says There Is No Co-Operation

Winnipeg, Man.—The Dominion Government cannot help Premier Bracken to finance provincial unemployment and other money issues because he will not play the game with us," Hon. H. H. Stevens, Federal Minister of Trade and Commerce, said in an interview here.

"During the past three years," he continued, "the Dominion Government has earnestly tried to co-operate with the four western provinces. In three provinces they have been successful, but in Manitoba no reciprocal co-operation was forthcoming.

"Not once but repeatedly Mr. Bracken has used the unemployment financing issue for political purposes, which makes it difficult for the Dominion Government to assist the province. I do not think Mr. Bracken has made the efforts which he could have made to handle the relief question."

## Predicts Stratosphere Flights

### New Type Airplanes Will Make This Possible Says Picard

New York—Professor Auguste Picard, aeronautics expert, said that on the strength of his studies during his 10-mile balloon ascension, aeroplanes are being built with airtight steel cabins to make possible flights in the stratosphere.

"These planes should go between 400 and 500 miles an hour," he said. "They will have little resistance because the air at that altitude is so light."

"Once the plane reaches such an altitude the pilot can set the course and cross from America to any point in Europe in a few hours."

Picard will go to Chicago, where he will advise preparations for the stratospheric balloon flight of his twin brother, Jean Picard, and Commander Settier of the United States navy.

## STABILIZATION OF CURRENCY BONE OF CONTENTION

London, Eng.—Prime Minister J. Ramsay MacDonald, chairman of the World Economic Conference, was said to be seeking elimination of the monetary stabilization question which constitutes the bone of contention at the conference.

The French delegation failed to carry out threats of demanding adjustment of the currency of the United States dollar should be stabilized, but the feeling of anxiety over the problem continued intense in conference quarters.

Quarters were clearly disturbed by the solid lining up of many countries opposed to dollar instability and it was unofficially pointed out in comment that one of the chief points of the Washington program was stabilization as soon as practicable along the lines laid down in the resolution submitted by Senator Key Pittman.

A succession of speakers pleaded for monetary stabilization as essential to restoration of confidence, including representatives of Italy, Switzerland, Poland, Norway, Germany, Russia, and Yugoslavia.

The discussion arose during consideration of a British resolution calling for easy money and cheap credit policies.

The conservative gold standard countries doubted the feasibility of the program and warned of its possible dangers.

## RESENTS TARIFF BRITAIN IMPOSES ON FREE STATE

London, Eng.—The Irish Free State quarrel with the United Kingdom arising from the nonpayment of the land annuities was brought before the world economic conference in an attack on the practice of imposing punitive tariffs.

The United Kingdom-Irish Free State tariff war was brought to the notice of the conference by Senator Joseph Connolly, Free State Minister of Lands and Forests, in a blunt speech before the private meeting of the sub-committee on commercial policy.

After dealing with the causes of the quarrel as the Irish Free State saw them, Senator Connolly turned to the "punitive tariff" which Great Britain was imposing against Free State goods.

"You will appreciate," Senator Connolly told the sub-committee, "how foolish it would be for our delegation to go on laboring towards a solution of tariff problems and restoration to 'normal conditions' in the interests of world economic peace without having this unique special privilege applied to one of the weaker countries by one of the great world powers, brought to your notice."

## Marine Insurance Rates

### Expect Lower Rates May Be Obtained For Bay Route

Ottawa, Ont.—Report of the imperial commission in which it found that the insurance rates on hulls and machinery on ships trading into Churchill could not be reduced this year, but the minimum rate was extended to apply to ships leaving Churchill as late as Oct. 7, instead of the previous limit of Sept. 30, was made public today by the department of marine.

The report appeared to be optimistic that lower rates might prevail in subsequent years if safety of the Hudson Bay route were demonstrated.

The report considered at length the ocean traffic into Churchill during the 1932 season when 10 cargo vessels made the passage through Hudson Bay and into Churchill. Nine made successful passages and one, the "Night Fly," was a total loss after striking an iceberg.

Reference was made to the former report in which the committee explained that "as long as there are only a few voyages in the season, a single casualty may quite likely absorb the whole or more than the whole of the money received by way of premium."

## Forest Fires In Ontario

### Swept Over Fifteen Mile Stretch Near Fort William

Fort William, Ont.—Only partially checked by a sudden shift in the wind, a raging forest fire was defying efforts of firemen to extinguish it and firefighters to quench it. It swept over a 15-mile stretch of cut-over timberlands, near Fort William, 85 miles west of here.

Lesser fires are burning at several places in the eastern section of the Thunder Bay district, causing considerable damage, and all available men in the area were drafted to fight them.

A Canadian National Railways bridge was destroyed near Hornepayne, temporarily cutting off communication between Long Lac and Port Arthur.

## Brighter Outlook

### Twenty Thousand Men Added To Industries In The East

Winnipeg, Man.—Saying that in May alone 20,000 men had been added to industries in the east and that in his trip through the west he had found hundreds of new men employed in mining, lumbering and manufacturing, Hon. H. H. Stevens, Minister of Trade and Commerce, said trade and commerce in the Dominion was encouraging. "Transportation is decidedly brighter" he said. "Car-loading and passenger transportation both show marked improvement. Cattle are moving well and 40,000 head will be shipped to Britain this season."

## Was Friend To Animals

New York—The animals would be sad if they could understand. Harry Daniel Moran, head of the Humane Society of New York, who spent 16 years helping suffering beasts, is dead.

## Tragedy Follows Buddha Idols

Unsigned Letter With Images Says They Possess "Evil Influence"

Two wooden images of Buddha and a stone reproduction of the god have left a trail of disaster in the homes of three London business men who in turn became their owners.

None of the three men believe in superstition. Yet in each case they have been the victim of strange ill-fortune.

"Within three days of the idols being placed in the sitting room of his home in south London," said a friend to a London newspaper representative, "the third man was struck down by a severe and little-known malady."

"He is engaged in the insurance business, and is noted for his hard-headedness. He had been warned of the evil influences exerted by the idols, but had laughed at the idea."

The first two men who owned the idols for a while had ample evidence of the "evil influence" to bring trouble in their train.

"Victim number one is a city man with offices in Bishopsgate. One day, the parcel containing the images of the god arrived at his office from an unknown source. He was on an Atlantic holiday cruise at the time."

"Yet on that day he was struck down with pneumonia. When he finally reached home his office was burgled—but the still unopened parcel was not touched."

"In the parcel was an unsigned letter, which stated that the images possessed an 'evil influence,' but no explanation was given why they had been sent him."

"He consulted a famous medium who said that the idols were Chinese, and belonged to the Ming period. She begged him to rid himself of them by throwing them in deep water."

"A few weeks later he gave them to a friend, having previously told him their history. His friend laughed, but three days later he was taken to hospital, having lost his memory and collapsed in the street."

"Now a third man has paid the penalty of possessing the idols—he was taken to a nursing home—and his wife is terrified lest further disaster shall come to the house, where the idols now are."

## Mysterious Old Man

Ontario Motorists Telling Stories Of Erie Experiences

Here's another story of the mysterious old man who, when picked up on the road, converses for a while and then disappears mysteriously from the back seat as the car parts along at 50 and 55 miles an hour.

A Waterloo, Ont., motorist swore it happened. Another at Galt became angry when friends doubted the story. A Kitchener lawyer now tells the tale.

He was driving alone when he met the old man with the patriarchal beard. The car stopped. The old man got in the back seat.

"Well," the driver said, "times are pretty tough on you, eh?"

"They are," the old man replied. "But the depression's over, mark my words. It ended on June 7."

The driver chuckled. "You seem to know."

No answer from the rear seat.

"I say," repeated the driver in a louder tone. "You seem to know."

Still no reply. The driver looked around. The rear seat was empty.

## A Unique Slip

Motorists following the Lincoln Highway through the Allegheny Mountains, east of Pittsburgh, United States, are amazed to find a "steamship" perched on the side of a mountain at one point where there is a particularly fine view of the surrounding country. The structure is a hotel and restaurant, built in the form of a boat, and stands at an elevation of 2,464 feet. From its deck tourists look into three states and seven counties.

## Noted Architect Dead

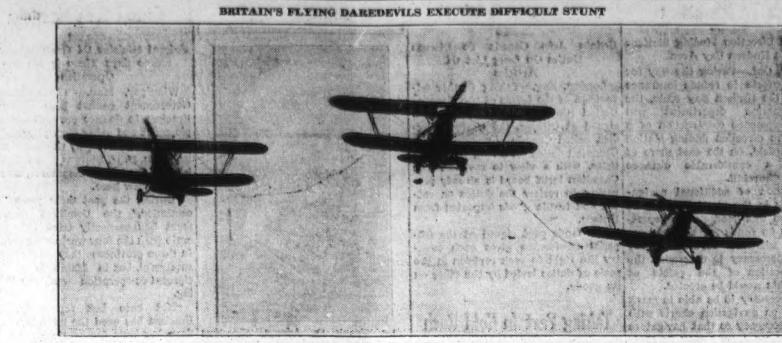

Frank Worthington Simon, architect who designed Manitoba's Legislative Buildings, and Fellow of the Royal Institute of British Architects died at Mentone, France, May 19. Other famous buildings designed by Mr. Simon include the Edinburgh International Exhibition and the Liverpool Cotton Exchange.

Meat is made up of small fibers about 1,750 to 1,400 of an inch in diameter, and up to about 1½ inches long.

"What would you do if you got a rich wife?"

"Absolutely nothing."

W. N. U. 2000

BRITAIN'S FLYING DAREDEVILS EXECUTE DIFFICULT STUNT  
Our press photographer was fortunate to catch this trio of Royal Air Force 'planes as they shot into the air tied together with cords to perform a series of breath-taking stunts. The daring pilots were putting on their show as part of the Royal Air Force Pageant at Hendon, England.

## Strange Tribe Discovered

Unknown Aboriginal Village Found On Island Of New Britain

Two hitherto unknown aboriginal villages, where widows insist on being strangled to death, have been discovered on the island of New Britain.

Patrol Officer H. R. Niall, of the New Guinea police came upon the villages while on an expedition across the island which lies to the east of New Guinea.

When a villager dies his widow demands death by strangulation in order that her spirit may be freed to join his. Officer Niall says, in a report to the Australian government:

"On some occasions the men, being afraid of consequences, have refused to strangle a woman," the report continues.

"Then it sometimes happens that the widow takes off her grass skirt and hands it to the man, telling them to put it on and saying that they are only women and not real men. This so shames them that they reluctantly kill her according to custom."

Consummation of the weird ritual is the duty of the widow's brother or her nephews who wind a native bay cloth around her neck and strangle it until she is choked.

Says Shakespeare Died After Merry Meeting

Diary In Washington Library States Party Was Bard's Finale

William Shakespeare died after a "merry meeting" at which it seems he drank too hard," according to the manuscript diary of Dr. John Ward who lived at Stratford-on-Avon a few years after the death of the Elizabethan dramatist.

Ward's diary is in Folger Memorial Library at Washington. It reads in part:

"I have heard that Mr. Shakespeare was a natural wit, without any art at all; he frequented the plays at his younger time, but in his elder days lived at Stratford, and supplied the stage with two plays every year, and for it had an allowance so large, that he spent at the rate of £1,000 a year, as I have heard."

"Shakespeare, Drayton, and Ben Jonson had a merry meeting and it seems drank too hard, for Shakespeare died of a fever there contracted."

## Balance On Credit Side

Gold Filings More Than Paid Australia's Dental Bill

A man in Brisbane, Australia, has found that there is considerable profit in having a mouth that is on the gold standard. He went to a dentist to have some teeth extracted and when he asked for his bill found that he did not owe anything. There was in fact money coming to him. The dentist handed him thirty shillings, which was the balance due him after he had been credited with the gold in the extracted teeth. With gold at its present premium there is money in the filings of worn-out teeth.

## Spends Time On Sea

Franz Analia Schlegel, who is 92, has made 62 crossings of the North Atlantic. Why? To while away the time.

"I am an old woman," she said before embarking for her 63rd voyage, "and I travel alone because I am all alone in this wide, wide world."

Large estates in Scotland are to sell their products direct to consumers.

Employment in Italy is increasing.

## Germany's New Rail Bus

Is To Be Tried Out By Long Island Railroad

The Long Island Railroad, one of the world's biggest carriers of suburban commuters, plans to try out a new type of railbus brought for the Chicago Century of Progress Exposition from Germany. The bus, made by the Austro-Daimler-Puch Works, is 23.6 feet long, seven feet eight inches wide and eight feet eight inches high. It is propelled by two 80 horsepower motors and develops a top speed of 90 miles an hour.

The car has double control and may be operated from either end. It has a double set of wheels, one of rubber and one of steel, the former being on the outside. The manufacturer explained that the rubber wheels carry the weight of the car while the machine itself is directed by the steel wheels just as a locomotive is guided automatically by the rails. The rubber and steel wheels are on distinct axles.

With the car when it arrived was Oskar Hacker, chief engineer of the company which built it, and Josef Mansfelder, chief mechanic. Herr Hacker said six of the buses were now in use in Austria, two in Poland and several more were being shipped to Ecuador. They weigh 20,300 pounds and accommodate 42 passengers.

Senator Capper Is Optimistic

Predicts Dollar Will For U.S. By End Of Year

Senators Arthur Capper, of Kansas City, looks for dollar wheat by the end of 1933.

Cheerfulness about the future was the keynote of an interview given by the United States Republican senator, a veteran in the fight for remedial farm legislation.

He said commodity prices should continue to rise, thus increasing employment and wages. He said, by the end of the year wheat will yield the farmer \$1.

Convinced the Magistrate

Charged with speeding, Aubrey D. Smith carried several tiny toy automobiles, including a model of the one on the barrister's table and showed Magistrate J. L. Barnhill just how it happened. He illustrated a situation in which it was necessary for him to speed as protection for himself and other drivers, and was acquitted.

It appears that a man can be cured of stammering by being taught to sing. Unfortunately a man can't be cured of singing by teaching him to stammer.

"We've just been having a tussle with the dentist."

"Which beat?"

"It ended in a draw."

Sweden Misses "Singing Count"

Killorglin Still Holds Annual Goat Festival

Original Character Of Stockholm Was Warshipped By Poor

The "Singing Count," one of the most popular and original characters of Stockholm, died in his home recently. Count Magnus von Rosen undoubtedly enjoyed greater popularity amongst rich and poor than any other public figure in Stockholm. He was a Bohemian aristocrat, always dressed with the most elaborate elegance, a man about town who would be seen daily leisurely walking along the most fashionable thoroughfares in the midst of his friends in some popular restaurant or cafe. He had a pleasant voice and received his nickname from his habit of singing aloud in the streets as he walked along and late night wanderers would often hear his gay echoes through the empty streets.

He was worshipped by the poor for he would always stop wherever he saw some one in need to give him one of the one-crown pieces with which his pockets were filled according to some cheerful and friendly words.

As a young man Count Magnus traveled for years in many parts of the world, including Australia, America and the East. He returned and settled down for good in Stockholm, which he loved more than any other place, and where he spent his time in making friends and in spreading the sunshine of his kind heart and gay wit along his path. The Stockholm press and public mourn him as one of the best representatives of the "good old days" and regret that the gay voice of the "Singing Count" has ceased to echo through the streets of "the Venice of the North."

Crossed Channel On Surf Boat

London Man Towed Across From Dover To Calais

Capitals D'Arcy Rutherford, of London, who has crossed the English Channel from Dover to Calais in a surf boat by a speed boat, says he held a tow rope which was fastened to a speed boat driven about 13 miles an hour. He reached Calais in an hour and 40 minutes.

The time would have been less, but he hit the wash of a big steamer, and several times Captain Rutherford had to lie flat to avoid being thrown over. The cold was intense, as he was wet through and were only shorts and a sweater.

Highway Bridge Joins Venice To Mainland

People Afraid Motor Traffic Will Disturb City's Peace

Venice, pearl of the Adriatic, has lost its isolation with the construction of a highway bridge between the mainland, two and a half miles away. Residents of the City of Lagoon are jubilant, however, Europe's "most serene republic" for the first time. Many of the older residents had never seen an automobile before.

The new bridge, built at a cost of \$4,500,000, parallels the Ponte Sella Laguna, a railroad bridge built 27 years ago. Some Venetians fear the advent of motor traffic will disturb the peace of the old city. The gondola, and its chauffeur, is bound to stay, however, as there are still many unbridged canals dividing the centre of Venice from the outlying parts.

Hotels For Hikers

Youth hostels are rapidly being opened in Scotland for the benefit of young hikers. They stay over night for a nominal sum and prepare breakfast in the morning. In 1931 there were nine hostels. Last year there were ten more and already in 1932 the total has reached thirty-two. In the first year 3,120 "bed-nights" were recorded and last year the total has risen to 22,336, which figure is expected to be far exceeded in the present season.

The French West Indies report that 1932 was a prosperous year there.

British ships earned \$260,000,000 in the last year.

Canada is the largest export

newspaper in the world.

## International Gang Of Spies Operating

Industrial Espionage As Well As Naval and Military

Espionage is no longer merely a matter of one country creating an organization for fanning out the military and other secrets of its neighbors. French secret service authorities declare.

It is now, in fact, rapidly passing into the hands of a minister international body with branches in every important centre. This syndicate has no national prejudice.

It is organized entirely on commercial lines and makes its business the collection of all information regarding the naval, military and aerial defences and preparations of the different countries.

The information is at the disposal of any nation willing to pay for it, and it is known that in many cases the usual secret service agents of different countries have found it easier to buy their information from this syndicate.

According to French authorities the head of the organization is an Englishman, but his lieutenants are men of all nationalities, and a number of women are employed as directors, whilst hundreds of "correspondents" are retained in different countries.

A branch concerns itself with industrial espionage, collecting and disseminating information about new industrial processes, and selling this to trade rivals of the firm concerned.

It has been proved conclusively that several suspected spies dealt with by the French courts recently were employed by this syndicate, and the information gleaned was passed on to at least three other European powers interested in French defence problems.

## Parachute Jumper Makes Contribution To Science

Proves Conscienceless Not Lost When Falling From Great Height

A parachute jumper in England created a record recently when he deliberately delayed opening his parachute until he had fallen a distance of over four miles. Then he landed quite safe and with all his wits about him.

This was a marvelous achievement, and was performed, not as a sensational "stunt," but as a contribution to science. People sometimes say that because a man fell from a great height he would be dead before he reached the ground, but this demonstration proves that there is almost no limit to the possible height which a human being may attain and fall to the ground fully conscious.

In this experiment the parachutist tumbled over and over, sideways, head first and fast first, at a speed which reached 160 miles an hour, yet he not only remained conscious until he opened his life-saver, but kept his head clear and was able to pull the cord at a chosen moment.—St. Thomas Times-Journal.

## Challenge To The Girls

Preacher Says They Do Not Fit In With Higher Education

The preacher who doesn't fit into the picture of higher education, according to Rev. Neil Herman of Halifax, Nova Scotia, who says the feminine mind cannot grasp many college subjects.

"You cannot fit the girl of this generation into the picture and have anything else but a puzzle," he declared in a sermon on "Our Latest Puzzles."

The girl who is called upon to tackle the entire program of study becomes a radical in some form or other," he continued. "Hundreds of thousands of them pass examinations but they don't swallow half what they read or what they are taught."

## Where Women Are Barred

British women are not permitted to hold office in the diplomatic and consular services as ambassador or consul, nor may they hold the higher administrative posts in the three Defense Departments on the ground that they are not liable to military service.

## Most Important

"You will find that this motorcar is the best argument you can have in proof of your prosperity," said a salesman.

"If that is true," said the prospective purchaser, "what I now want to know is, shall I always be able to afford to keep this argument home?"

Canada is the largest export

## CHAPTER XII.—Continued.

She held his hand a moment in her warm clasp, thinking of her father lying dead at Resolution of Alan's noble struggle to save him, of Haskell breaking her father's will to live. It was some solace to know that she had helped Alan plan a trap for the guilty Inspector, a deadly trap if Haskell only walked into it.

As she quietly wished him good luck, in her heart she was fervently saying to him, "God go with you, Alan!" And because she had passionately resolved not to see him again before she left, she meant her words now only for the stormy hour ahead of him, but for all the years of his life.

Alan strode into the cabin in a savage fighting mood. He had risen from a sick bed, come to Endeavour before Williamson left, and he had known he was going to meet Haskell. The Inspector had forced him out of the Mounties, had caused Larry to be crippled for life; had refused protection to Joyce in her desperate need; had made a scapegoat of Dave MacMillan to save his face; and more than anyone on earth he was responsible for that sorry tragedy at Resolution.

Almost the only hope Alan had was that trap which he and Joyce had planned—an idea born in Joyce's quick brain and developed between them during the three days he had nursed him.

When he went in, he found Williamson and Haskell sitting at the desk, waiting. Haskell did not move; but Williamson, considerate of his wounds, drew up a chair and invited him to sit down.

"Won't you give us the story of your patrol, Baker?" he requested kindly.

Alan countered: "My story doesn't begin with this patrol. It begins last fall, when this gentleman here came down north. I want to tell it clean, from then till now."

"That's your right," Williamson assented.

Alan hoped that his story, by the sheer blunt truth of it, would carry conviction. But when he finished, the old officer did not comment. The silence was foreboding. Almost in desperation, Alan took up a couple of matters that lay very near his heart.

"There's two or three favors I want to ask of you, sir. Since they're not in my own behalf, you may agree to them. One is about Chink Wolley, the man we brought in. I want to put in a word for him. He deserves heavy punishment but he shouldn't be hanged. He gave us some precious information. We might never have saved Joyce MacMillin if he

## TIRED AND IRRITABLE?

Take Lydia E. Pinkham's Vegetable Compound

It steadies the nerves and helps to build you up. You will eat better... sleep better... look better. Life will seem worth living again. Remember that 98 out of 100 women say, "It helps me." Let it help you too. Liquid or tablet form, as you prefer.

W. N. U. 2000

hadn't. If it's impossible for me to be present at his trial I want to turn over to you an affidavit in his behalf. Then, about Featherof, my partner in this patrol. He stole some government property and broke some flying regulations. But he made the whole thing possible, he threw in with me without a thought of pay, he risked his life half a dozen times. We're in position to restore that property or else pay for it in full. Will you get Featherof out of this jam?"

"How about yourself, Baker?"

"Well, I don't want to be jailed, if I can help it. But I suppose your favors will stretch just so far. I was the instigator, and if anybody has to pay, I'm the one."

Williamson was thoughtful. Few times in his career had he ever allowed motive, however worthy, to be excuse for breaking the law. But he glanced at Baker, wounded, maimed in one hand, still pale from loss of blood, he thought what a heartless travesty of justice it would be if Baker were imprisoned. Whatever the truth of his trouble with Haskell, the great fact remained that he had gone on damn him. Williamson's probe was leading in the right direction, leading toward that deadly trap.

Alan's consternation. Bill Hardstock burst out: "Proof? H—l's blue blazes! Alan was half sick, all the way up the Alooosa, because of them orders. He felt he was being forced to take us men into a terrible danger. All we knew it was crazy to split up."

Williamson silenced him. "You're merely making an assertion, corporal. You have no proof. Baker, do you admit responsibility for that patrol?"

Alan shook his head. "No, I—don't, sir. The statement—"

Haskell smiled. He had Baker on the run.

Williamson reminded: "Baker, you signed a statement of responsibility. Whipple was a witness."

Alan pleaded. "Sir, that statement—When we came back—yes, I signed it. But I—I had to."

"You had to?"

"Yes, to get out of the Mounted. He wouldn't let me buy out unless I did sign."

"Why under heaven did you want to buy out all that fast and furious?"

"I wanted to be free," Alan led on, step by cautious step. "I wanted to go after those men."

"Baker, look here," Williamson said sternly. "You infer you wanted to go after those men so badly that you were willing to buy out, cut off your record and sign a lie. Why then wouldn't you co-operate with Haskell to get them?"

"Well, sir, he—he wouldn't co-operate."

"I can't believe that. He tried to help you ever afterward—after you bought out and were on a private vacation."

"What was that?" Alan queried. "At En Travers Lake."

"So he was trying to help us. I didn't—ah—have that impression at the time, sir."

"He even shot signals for you to wait."

Bill Hardstock swore luridly. "Or the boat of 'em all!"

Alan allowed the lie to go unchallenged. If Haskell got by with that one, he would be bold and unvarying.

(To be Continued.)

We've had to pay, too, for the inspector's acts. Here's one of us crippled for life because the inspector hog-tied us on that patrol with some fool orders. After a thing like that, we have to shut up and take it and not even be allowed to—?"

"Sit down!" Williamson bade them. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want you to answer some questions. What made you split your detail on that first patrol?"

Haskell ordered me to, sir. He ordered me to follow both branches. When I objected, he threatened to bust me and keep me here at the post."

"That's a lie!" Haskell challenged.

"I allowed him to do as he thought he pleased for life because the inspector hog-tied us on that patrol with some fool orders. After a thing like that, we have to shut up and take it and not even be allowed to—?"

"Sit down!" Williamson bade them. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want you to answer some questions. What made you split your detail on that first patrol?"

Haskell ordered me to, sir. He ordered me to follow both branches. When I objected, he threatened to bust me and keep me here at the post."

"That's a lie!" Haskell challenged.

"I allowed him to do as he thought he pleased for life because the inspector hog-tied us on that patrol with some fool orders. After a thing like that, we have to shut up and take it and not even be allowed to—?"

"Sit down!" Williamson bade them. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want you to answer some questions. What made you split your detail on that first patrol?"

Haskell ordered me to, sir. He ordered me to follow both branches. When I objected, he threatened to bust me and keep me here at the post."

"That's a lie!" Haskell challenged.

"I allowed him to do as he thought he pleased for life because the inspector hog-tied us on that patrol with some fool orders. After a thing like that, we have to shut up and take it and not even be allowed to—?"

"Sit down!" Williamson bade them. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want you to answer some questions. What made you split your detail on that first patrol?"

Haskell ordered me to, sir. He ordered me to follow both branches. When I objected, he threatened to bust me and keep me here at the post."

"That's a lie!" Haskell challenged.

"I allowed him to do as he thought he pleased for life because the inspector hog-tied us on that patrol with some fool orders. After a thing like that, we have to shut up and take it and not even be allowed to—?"

"Sit down!" Williamson bade them. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want you to answer some questions. What made you split your detail on that first patrol?"

Haskell ordered me to, sir. He ordered me to follow both branches. When I objected, he threatened to bust me and keep me here at the post."

"That's a lie!" Haskell challenged.

"I allowed him to do as he thought he pleased for life because the inspector hog-tied us on that patrol with some fool orders. After a thing like that, we have to shut up and take it and not even be allowed to—?"

"Sit down!" Williamson bade them. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want you to answer some questions. What made you split your detail on that first patrol?"

Haskell ordered me to, sir. He ordered me to follow both branches. When I objected, he threatened to bust me and keep me here at the post."

"That's a lie!" Haskell challenged.

"I allowed him to do as he thought he pleased for life because the inspector hog-tied us on that patrol with some fool orders. After a thing like that, we have to shut up and take it and not even be allowed to—?"

"Sit down!" Williamson bade them. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want you to answer some questions. What made you split your detail on that first patrol?"

Haskell ordered me to, sir. He ordered me to follow both branches. When I objected, he threatened to bust me and keep me here at the post."

"That's a lie!" Haskell challenged.

"I allowed him to do as he thought he pleased for life because the inspector hog-tied us on that patrol with some fool orders. After a thing like that, we have to shut up and take it and not even be allowed to—?"

"Sit down!" Williamson bade them. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want you to answer some questions. What made you split your detail on that first patrol?"

Haskell ordered me to, sir. He ordered me to follow both branches. When I objected, he threatened to bust me and keep me here at the post."

"That's a lie!" Haskell challenged.

"I allowed him to do as he thought he pleased for life because the inspector hog-tied us on that patrol with some fool orders. After a thing like that, we have to shut up and take it and not even be allowed to—?"

"Sit down!" Williamson bade them. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want you to answer some questions. What made you split your detail on that first patrol?"

Haskell ordered me to, sir. He ordered me to follow both branches. When I objected, he threatened to bust me and keep me here at the post."

"That's a lie!" Haskell challenged.

"I allowed him to do as he thought he pleased for life because the inspector hog-tied us on that patrol with some fool orders. After a thing like that, we have to shut up and take it and not even be allowed to—?"

"Sit down!" Williamson bade them. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want you to answer some questions. What made you split your detail on that first patrol?"

Haskell ordered me to, sir. He ordered me to follow both branches. When I objected, he threatened to bust me and keep me here at the post."

"That's a lie!" Haskell challenged.

"I allowed him to do as he thought he pleased for life because the inspector hog-tied us on that patrol with some fool orders. After a thing like that, we have to shut up and take it and not even be allowed to—?"

"Sit down!" Williamson bade them. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want you to answer some questions. What made you split your detail on that first patrol?"

Haskell ordered me to, sir. He ordered me to follow both branches. When I objected, he threatened to bust me and keep me here at the post."

"That's a lie!" Haskell challenged.

"I allowed him to do as he thought he pleased for life because the inspector hog-tied us on that patrol with some fool orders. After a thing like that, we have to shut up and take it and not even be allowed to—?"

"Sit down!" Williamson bade them. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want you to answer some questions. What made you split your detail on that first patrol?"

Haskell ordered me to, sir. He ordered me to follow both branches. When I objected, he threatened to bust me and keep me here at the post."

"That's a lie!" Haskell challenged.

"I allowed him to do as he thought he pleased for life because the inspector hog-tied us on that patrol with some fool orders. After a thing like that, we have to shut up and take it and not even be allowed to—?"

"Sit down!" Williamson bade them. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want you to answer some questions. What made you split your detail on that first patrol?"

Haskell ordered me to, sir. He ordered me to follow both branches. When I objected, he threatened to bust me and keep me here at the post."

"That's a lie!" Haskell challenged.

"I allowed him to do as he thought he pleased for life because the inspector hog-tied us on that patrol with some fool orders. After a thing like that, we have to shut up and take it and not even be allowed to—?"

"Sit down!" Williamson bade them. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want you to answer some questions. What made you split your detail on that first patrol?"

### Local News

Mrs. Wm. Waldock of Three Hills is visiting friends here.

George Leask of Madden is building an addition to his home.

Mr. D. W. Whillans returned on Sunday from Toronto.

Rev. and Mrs. Longmire and family arrived here from Carseland on Wednesday.

Mr. and Mrs. L. Bliss and Miss Alice Bliss of Calgary were visiting friends here on Sunday.

Mr. and Mrs. W. D. McCool and Mrs. J. Abra were visitors in Calgary today (Thursday).  
J. Williams, Provincial Health Inspector, gave the town the once over on Saturday.

Mr. and Mrs. W. Choiniere and daughter Jacqueline of Medicine Hat are visiting at the home of Mr. and Mrs. Sam Fleming.

Neighbors of Mrs. W. F. Stone did a kind act recently when they turned out and done her summer following.

Mrs. A. Cruckshank returned home today (Thursday) after spending the past two weeks visiting relatives at Wayne.

You can get an excellent dinner at the Oliver Cafe on Dominion Day for 35c. Come and let George do it.

Stanley Reid and his brother Cliff and Mrs. Reid left Calgary on Sunday morning on an auto trip to Langley Prairie, B.C., where they will visit their parents.

Jas. Aldred, sr. returned home on Sunday after spending a month visiting his sisters at Detroit. Jim reports a wonderful trip, and only regrets that he could not stay longer.

The Misses Margaret and Kathleen Fitzpatrick, and Miss Veena Green will compete in the Provincial Track Meet at Drumheller on Dominion Day.

At a meeting of the West Hope S. D. held on Monday night, Miss Wenstrom was re-engaged as teacher for the ensuing term at a salary of \$84.00.

Mrs. Wm. Wrigley, Jr. of Chicago, passed through town on Thursday last on her way to Jasper. She was accompanied by a secretary, two chauffeurs and two pack-ages of Wrigley's famous gum.

### United Church Notes

The Local Church Board wish to publicly thank all those who so willingly responded to the canvas for funds in order that their obligations to Rev. Young could be met.

Mr. and Mrs. J. B. MacLaren and son Robt. of Bowden were renewing old acquaintances in town during last week-end and were in attendance at the United Church on Sunday.

Rev. Young preached to a big congregation on Sunday morning last in the Rodney school house. The seating capacity was severely taxed and blocks of wood had to be used as seats, also a number of planks were in evidence.

The United Church was well filled on Sunday last when Rev. Young preached his farewell sermon as pastor of the local church. Mrs. J. Crocker sang a solo. Rev. Young and family left town for their new charge in Trochu on Wednesday.

A very pleasing gathering took place at the home of Mrs. Wm. Laut on Thursday of last week, when the ladies of the Rodney district met to pay tribute to Rev. and Mrs. Young, at which they were the recipients of a set of china.

On Saturday last Rev. and Mrs. Young were the recipients of a beautiful rug the gift of the Crossfield Ladies Aid. The Ladies Aid from Inverlea district sent in to the Church Secretary, a cheque to be added to Rev. Young's salary account.

## School Fair Building

The School Fair Association have torn down the old grandstand and have partly completed the new building, are now at the end of their resources. As the building now stands it has cost the Association \$30.00 and a lot of labor, and the \$100 supplied by the Rosedub M. D. And if sufficient funds can be raised to finish this building labor can readily be found to do the work.

It is a real substantial building and well worthy of being properly finished and painted, not only as an asset to the town, but we can truthfully say that we have the only School Fair building in the Province.

It would cost about \$60 to finish the building, which is not a very formidable amount if every one did their bit.

When you are at the celebration on July 1st, take a look at what has been done and decide to make a donation to the Building Fund.

### CALF CLUB

The next judging lesson of the above club will be held on the first of C. A. Havens, seven miles straight west of town on Friday, July 7th. Members and their families are invited to bring the makings for a picnic at 2 p.m.

A meeting of the Crossfield U. F. A. will be held on Saturday, July 1st at 8 o'clock. A representative of the Federal Consumers Oil Co. will address the meeting.

Angus Robertson finished second in the calf roping contest at the Sundre Stampede last week. Jas. Leask of Madden was fourth. The local boys made an excellent showing against the best ropers in Western Canada.

### SCHOOL BOARD MEETINGS

(continued from Page 1)

This meeting was not called according to the Act, and on protest of Mrs. Harrison, was called off.

On Monday night at a regular meeting the Board got down to business and in short time had disposed of the business of the meeting.

The Board still believing that by pruning salaries is one way of beating depression, carved the salaries of Miss Collicutt and Miss Seville from \$900.00 to \$840.00; Mrs. Emery's salary was allowed to stand at \$1000.00; while Mr. Tweedie was let out.

In fairness to Mr. Tweedie it must be admitted that the School Board of last year had him over a barrel, and the principalship of the school was forced onto him at a time when he could not better himself. He had no previous experience as principal, but the year previous had given excellent satisfaction as a teacher.

We understand it is the intention of the Board to engage a married man as principal, and of course he will have all the qualifications that go with a position of that rank. The salary will remain at \$1100.00 and if Grade XII is taught this amount will be increased to not more than \$300.00.

Grade XII will be taught providing sufficient pupils make application on a payment basis not to exceed \$15.00 a unit.

A meeting of the electors will be held in the Town Hall on July 14th, at two o'clock for the purpose of electing a trustee to complete the term of Mrs. Harrison who has resigned.

The above is a free advertisement run so that the citizens in general will turn out to the meeting and elect some one to the most thankless job in the world. Remember the date—July 14th at 2 o'clock.

### GET THIS

#### CLAUSE D. SECTION 2

#### "ELECTOR" SHALL MEAN—

(II) In any established district, any person of the full age of twenty-one years who is and has been a resident thereof for a period of at least one year immediately prior to the date of any school meeting.

#### SECTION 64

Subject to the provisions of any special Act or Charter no person shall be nominated for, or be capable of being elected to, the office of trustee unless he is—

- (a) A British subject.
- (b) An elector of the district; and
- (c) Able to read and write.

## J. W. A. Notes

On Monday afternoon the J. W. A. met at the rectory for their closing meeting. After the business session, the girls indulged in a social time. A delightful tea was served by the hostess. Games and peanut scrambles were enjoyed by all, the girls going home very happy.

The next meeting will be held in September.

### Dominion Day Mail Service

Saturday, July 1st, being Dominion Day, the rural route will not be delivered.

The post office tickets will be open for one hour from 10 to 11 a.m.

Calgary will hold their annual celebration on Wed., July 12.

### ISAW

Happily predicting that Tom would be smoking cigarettes in another two years, Thomas Fitzgerald admitting that he doesn't know whether he's got a chev. or the chev. has him. Dean looking for six dozen hats.

McMurry has effected with Mountain. A local young fellow working the fence in front of the United Church. Mitt has not lost any of his power when swinging a sledge hammer. The two Walks in a heated argument—Les and Vivian close at hand in case of an emergency.

### Mr. Winning Leaves for Hanna

After six years' service as accountant at the Canadian Bank of Commerce here, J. P. Winning has been transferred to the branch at Hanna and leaves for that point on Monday next.

A native of Kilmarnock, Scotland, "J. P." or "Jim"—as he is familiarly known—came to Canada in 1911. When war broke out, he enlisted in the 10th Battalion at Weyburn, Sask. and served in the Tenth, with the First Canadian D. H. Q. till 1919. After further service with the Bank of Commerce, he came with his family to Crossfield in July 1927. (Space does not allow us to say half of what we would like to say, but it is no exaggeration to say that his leaving is a distinct loss to the community.)

As a rule a banker is not popular; but J. P. has been all the bank could wish for in an executive, and at the same time has won the affection of all he has come in contact with.

Mrs. Winning's talent in music is recognised; and the church as well as her large circle of friends will miss her from amongst us.

Our best wishes go with them and their son, Martin, and they can always be sure of a welcome at any time they return to Crossfield.

Anyone who wishes to be a member of the Board of Trade on July 1st will be able to obtain a membership ticket at the Fair Grounds from any of the Committee or the Secretary.

A Special Dance will be held in the East Community Hall on Friday, July 7th. Calgary Collegians Orchestra and the Warbling Cowboy, Round-up Camp Supper free. General admission: Gent's 50c. There will be five Jitney Dances at 5 cents each. Special Stampede prizes for the jitney dances. Don't miss it.

A great many subscription accounts to the Chronicle are now due, and we ask that these be paid this month.

NOTICE—Barber Shops in Crossfield will remain closed all day on July 1st.

Don't bother putting up a lunch on Dominion Day, when you can get a full course dinner at the Home Cafe for 25 cents.

### Church of the Ascension

#### (Anglican)

Sunday, July 2nd.

Evening at 7.30 p.m.

Sunday School a.m.

Sunday School and Congregational Picnic at Bowness Park Wednesday, July 5th. Cars will leave the church at 9.30 a.m.

## Bush League Baseball

Sunday's Results  
Dog Pound 12; Bottrel 7  
Madden 10; Water Valley 9  
Cremona 15; Atkins 8

The Bottrel and Dog Pound game was featured by heavy hitting, Dog Pound collected 18 hits. Lake Parsons getting 2 homers and Fred Wilson 1. Tom Brabender held the Cremona team to 6 hits.

### League Standing

	Won	Lost	Per.
Cremona	6	1	85%
Dog Pound	6	1	84%
Bottrel	4	3	57%
Madden	3	4	42%
Water Valley	2	5	33%
Atkins	0	7	00%

A light drizzle of rain began to fall in this district on Wednesday night and has continued on and off since. Crops have been greatly benefited.
